More
Top Commitment

The Meiji Group expands the world of Tastiness, Enjoyment, Health, and Reassurance across a wide range of products for every customer, from infants to senior citizens. We provide value in Food and Health that is always moving one step ahead, and we continue to grow in Japan and throughout the world, leveraging our strengths in technology and expertise developed over 100 years of experience.

At the same time, the world has high expectations for the Sustainable Development Goals of the United Nations in the face of global warming, population growth and food shortages, plastics polluting our oceans, and other grave developments.

To respond to the expectations of society, the Meiji Group created the Meiji Group CSR 2026 Vision. We have designated Sustainable Procurement as a common theme together with Healthier Lives, Caring for the Earth, and a Richer Society, defining materiality and setting key performance indicators as part of moving toward this vision to solve societal issues through our businesses.

Our core business is to help people live Healthier Lives. To contribute to healthier diets and respond to an ultra-aging society, we identify the health needs of our diversifying customer base. Then, we use our strengths developed through foods and pharmaceuticals, as well as our advanced expertise in nutrition and medicine, to offer new value.

In Caring for the Earth, we share and address the issues in common with the entire planet. Here, we are adopting renewable energy as part of our decarbonization policy. We are also working to reduce food loss by half and recycle plastic resources.

A Richer Society is a society that creates connections among people. We respect human rights and diversity, while fostering the type of personnel necessary for creating innovation. At the same time, we strive to create a positive workplace for all that encourages health management and offers work-style reforms.

Finally, under our common theme of Sustainable Procurement, we are moving forward steadily with plans for using certified palm oil as a substitute ingredient, while coordinating with organizations involved in procurement activities that reflect a respect for human rights and the environment.

To communicate our CSR vision and corporate stance, we have added policies related to taxes, anti-corruption, and other governance matters in addition to the policies on human rights, occupational
health and safety, environment, and procurement already in place. We will continue to address these and other initiatives as a group.

The Meiji Group is serious about corporate growth, as well as addressing the social issues surrounding our businesses. As we contribute solutions to these issues, we strive to help create a sustainable society.

March 2019

Kazuo Kawamura
President and Representative Director
Meiji Holdings Co., Ltd.
Healthier Lives

SDGs

We contribute to healthy minds and bodies through our business activities.

Contribute to Healthy Diets

KPI

1. Develop products that contribute to healthy diets and a super-aged society
2. Enroll a total of 500,000 people into nutrition and healthy diet education within three years from FYE March 2019 to FYE March 2021

Develop Products That Contribute to Healthy Diets

Consumers are going through lifestyle changes and diversifying health and nutritional needs. In response, we will leverage the strengths of our Food and Pharmaceuticals businesses and make use of our advanced expertise in the nutrition and pharmaceutical fields to offer new health value-added products.

Approach

(1) Product Development by Utilizing Healthy *Lactobacillus* and Cocoa Ingredients

We will develop new probiotics, focusing on lactobacillus, and expand our lineup of high cocoa-content chocolate products that offer healthy cocoa polyphenols.

(2) Product Development by Utilizing New Healthy Ingredients

Link

- Research Library in Food Segment
We will discover original ingredients and develop new products that support healthy lifestyles through exercise and physical activity.

(3) Develop Health-Conscious Products

We will develop new products using healthy lactobacillus, cocoa polyphenols, and other healthy ingredients. We will develop new products that contain healthy ingredients to support healthy lifestyles. Moreover, we will discover and supply products featuring reduced sugar, fat, calories, etc., to support the healthy needs of consumers.

Examples of Health-Conscious Products

- **General products**
  - Meiji Probio Yogurt LG21
  - Meiji Probio Yogurt R-1
  - Meiji Bulgaria Yogurt LB81 Plain
  - Chocolate Kouka Cocoa 86%

- **Products with Reduced Sugar, Fat, Calories, Etc.**
  - Meiji Oishi Gyunyu drinking milk (Low Fat)
  - Meiji Bulgaria Yogurt LB81 (Low Sugar, Zero Fat)
  - Meiji Probio Yogurt R-1 (Low Fat, Zero Fat, Low Sugar/Low Calorie)
  - Meiji Probio Yogurt LG21 (Low Sugar/Low Calorie)
  - Meiji Offstyle (Zero Cholesterol, Low Trans Fats)
  - Meiji Corn Soft margarine (Low Trans Fats)
  - Meiji Butter in Tube 1/3 Cholesterol (one-third the cholesterol of butter)

(4) Develop Value-Added Nutrition Products

Changes in lifestyles mean new and varied eating patterns. We intend to leverage Meiji’s nutrition design technology to develop total products (including volume, format, packaging, etc.) for the infant nutrition, sports nutrition, and medical nutrition fields.

- **Evidence**

  Total Sales of Health-Conscious Products (Millions of yen)
  - FYE March 2015 174,049
  - FYE March 2016 200,193
  - FYE March 2017 222,288
  - FYE March 2018 221,914
Promote Healthy Diets and a Healthy Food Culture

We offer products that support, and promote the awareness of, healthy diets and food culture to support the healthy lifestyles of our customers.

Approach

(1) Expanding Nutrition and Healthy Diet Education Activities

Our education activities focus on three areas: Value and enjoyment of food, nutritional balance, and food-related safety and reassurance. We create opportunities for our customers to learn about and enjoy food, as well as to better understand the nutritional value and health benefits of different foods.

Since FYE March/2007, our nutrition and healthy diet education staff in five regions throughout Japan have visited local elementary and junior high schools to provide on-site classes. We also engage in community-based food and nutrition seminars for adults. We amplified these activities in FYE March/2018 by holding other classes (exercise, food, and nutrition classes; gargle and hand-washing classes; fun milk classes; and chocolate and cocoa classes).

We also sponsored an Olympic and Paralympic Games education program during FYE March/2018. Through experiences and lectures, participants learned the importance of sports and how physical training for sports contributes to improved health over the course of our entire lives.

Evidence

Nutrition and healthy diet education activities : FYE March 2018
Domestic : 3,200 classes and seminars
170,000 participants
Overseas : 1,833 participants

(2) Plant Tours

Meiji Co., Ltd. plants include visitor centers that offer educational plant tours. Visitors can observe production processes firsthand, while learning about our commitment to food safety and reliability. These visitor centers also conduct fun and interactive classes. During FYE March/2018, more than 205,000 people visited one of our seven domestic food plants.
Three overseas plants (Meiji Ice Cream (Guang Zhou) Co., Ltd. (China), Meiji Dairies (Suzhou) Co., Ltd. (China), and Meiji Seika Food Industry (Shanghai) Co., Ltd. (China)) have been certified as centers for science and technology information, serving as proper models for the spread of science and technology information. Nearly 10,000 people visit one of these three plants annually.

**Results**

**Plant tours :** FYE March 2018  
**Domestic :** 205,000 participants  
**Overseas :** 10,666 participants

Meiji Ice Cream (Guang Zhou) Co., Ltd.: 7,263 participants  
Meiji Seika Food Industry (Shanghai) Co., Ltd.: 3,403 participants

(3) **Supporting Nutrition Through Sports**

We provide a foundation for using sports to support healthy development, to build strong bodies, and to develop strong minds through food and nutrition. At nutrition seminars, we disseminate information on sports nutrition, including information to promote an understanding of preferable food choices and the proper use of supplements. We partner with associations and federations to provide nutritional support toward developing future top athletes. Through sports nutrition, we will continue to support the next generation of promising, talented, and versatile young athletes and their coaches.

**Results**

**Sports Nutrition seminar: FYE March 2018**  
**Domestic :** 2,100 seminars  
99,000 participants

*Sports Nutrition Seminar: Seminars offering information gained through nutrition support provided to junior athletes, student athletes, and runners.*

**Link**

- SAVAS (Whey Protein)  
- VAAM (Vespa Amino Acid Mixture)

(4) **Communicating Information About Milk, Lactobacillus, and Cocoa**

We publish and present the results of research on milk, Lactobacillus, and cocoa (raw ingredients in our products) in white papers and at conferences. We explain healthy effects of milk, Lactobacillus, and cocoa to our customers through nutrition and healthy diet education and plant tours. We will continue to pursue our mission of educating the world about health and nutrition.

**Link**

- Innovations in Food Segment
(5) Home Delivery Service

We provide milk product home delivery services straight to the consumer through our distributors. This service is very popular with consumers throughout Japan. The mission of our home delivery service is to be near the consumer, contributing every day to their health. Our home delivery service reaches 2.6 million families, growing through improved distribution and outreach to local dairy distributors.

Our distributor network includes distributors who face losing their business due to owner age or lack of a successor. Realizing the need to help businesses develop successors, we launched the Meiji Home Delivery Service Academy (training program for young leaders willing to take over businesses) and the Meiji Home Delivery Service Symposium (sharing examples of successfully run businesses) on an ongoing basis. We also sponsor the Milk Staff of the Year award to recognize outstanding distributor staff members. In these and other ways, we work to train and improve the skills of distributor personnel.

Respond to a Super-Aged Society

KPI

1. Develop products that contribute to healthy diets and a super-aged society
2. Enroll a total of 500,000 people into nutrition and healthy diet education within three years from FYE March 2019 to FYE March 2021

Develop Products That Contribute to a Super-Aged Society

Through original research and nutritional design, we offer products for consumers to take in the nutrient content and energy they require.

Approach

Developing Delicious, Easy-to-Use Nutrition and Liquid Foods for the Elderly

We conduct product research and development related to malnutrition. One of our strengths is the unique nutrition engineering technology we have accumulated through many years of research on infant formula. We design the nutrition of food products for the elderly based on clinical nutrition research focused on this consumer segment. Moreover, we improve existing products to make them easier to handle and drink at home.

Open Innovation

We have entered new research fields, including regenerative medicine and advanced medicine. We have started joint research in regenerative medicine with RIKEN Center for Developmental Biology, and we have undertaken collaborative drug discovery research related to autoimmune diseases and cancer with the Foundation for Biomedical Research and Innovation.
Link

KOBE Life Science Cluster Company List

Conduct Educational Activities Aimed at Preventing Malnutrition

Japan has become a super-aged society, with more than a quarter of its population over the age of 65 years. While obesity and metabolic syndrome have attracted much attention, some elderly people suffer from malnutrition. Malnutrition means having insufficient nutrition to be active due to inadequate intake of food and protein. The elderly suffer from malnutrition because they eat less, or because their diets lack variety. These habits stem from changes in living situations or from the weakening of bodily functions with age.

Approach

Seminars About Malnutrition for Healthcare Professionals and the Elderly

We conduct educational activities focused on malnutrition and malnutrition prevention. Our goal is for the elderly to avoid malnutrition and lead active daily lives. We hold seminars about malnutrition and malnutrition prevention, targeting healthcare professionals at in-home-care support centers, drug store employees, and the elderly. Specifically, we provide information about nutrition and meals recommended for the elderly. We also discuss the preparation of meals that are easier to eat for elderly people who have difficulty swallowing.

Publishing Information via Our Website

We publish information about malnutrition on our Japanese website.

Improve Nutrition in Emerging Countries

Communicate Information on Nutrition Improvement in Emerging Countries

Many people in developing countries and emerging economies suffer from nutritional deficiencies and malnutrition. As a company in the food business, we want to help solve these issues, working with groups that encourage nutrition improvement to raise awareness about diet and nutrition through educational activities.

Approach

Nutrition Improvement in Emerging Countries
Over time, Japan has overcome its own historical malnutrition issues through school lunch programs and nutrition education policies. The private sector has contributed via food development and supply, offering excellent insights and good practices related to nutritional improvement. Japan has also worked to solve the diseases and illness arising from over-nutrition, including obesity, noncommunicable diseases, and micronutrient deficiency on a variety of levels. At the same time, people in developing and emerging countries face nutritional deficiencies and malnutrition. The severity and urgency of this issue is covered in the news globally.

The Government of Japan announced that it will lead public-private partnerships for nutrition improvement, amplifying global efforts to improve nutrition in the lead-up to the Tokyo 2020 Olympic and Paralympic Games. In a health and medical care strategy formulated in 2014, the Japanese government set a goal to boost the international business initiatives based on public-private partnerships, as well as other activities aiming to improve nutrition in emerging and developing countries.

The Nutrition Japan Public Private Platform (NJPPP) was established in 2016 to achieve this goal. This platform aims to promote nutritional improvement through collaborations in the public and private sector, facilitating the business environment for food companies engaged in nutritional improvement activities in developing countries. The platform also advances initiatives targeting the creation of shared value beyond corporate social responsibility to expedite corporate growth and resolve current issues in society. Meiji Co., Ltd. joined the NJPPP in 2016.

---

Ensure the Sustainable Supply of Pharmaceuticals

**Ensure the Sustainable Supply of Drugs for Infectious Diseases, Drugs for Central Nervous System Disorders, Generic Drugs, and Vaccines**

Our Pharmaceuticals business has developed an infrastructure to ensure a reliable, stable supply of drugs in Japan and throughout the world. The business has conducted a risk assessment, preparing a supply network capable of responding flexibly to any unforeseen circumstances.

**Approach**

1. **Optimization of Production Site Allocations in Japan and Overseas to Ensure Stable, and Low-Cost Supply**

   We have optimized our production site allocations in Japan and overseas (Thailand, Indonesia, India, and China) to form a network ensuring the stable, and low-cost supply of drugs.

2. **Sustainable Supply of Vaccines**

   KM Biologics Co., Ltd., has become a wholly owned consolidated subsidiary since July 2018. This company researches, develops, manufactures, and supplies an extensive range of human and veterinary vaccines, and blood plasma products.

   **Manufacturing Vaccines That Combat New Strain of Influenza Viruses**

   As a recipient of a grant from the Japanese Ministry of Health, Labor and Welfare (MHLW)'s Influenza Vaccine Production Process Development Project, we are working to expand production capacity to accommodate the vaccination needs of 57 million people (almost half the population of Japan) in preparation for an influenza pandemic.

   **Single-Supply Products**

   We have a number of single-supply products including habu (poisonous snake) antivenom, a hepatitis A vaccine, anthrax vaccines for animals, and a range of diagnostic agents.

   *Single-Supply Products*: Products only manufactured by a single pharmaceutical company in Japan. No alternative products are available in Japan.
Developing and Supplying Orphan Drugs*
We manufacture seven orphan drugs approved by the MHLW (as of July 2, 2018).

* Orphan Drugs: Drugs specified by the MHLW for the treatment of diseases with less than 50,000 patients in Japan who require a high level of medical care.

(3) Access to Medicine
We collaborate with certain organizations to improve access to medicine in developing and emerging countries.

Topics
- Supply Patients with KANAMYCIN Through Stop TB Partnership

We are helping improve access to pharmaceuticals in emerging countries by supplying the antituberculous drug KANAMYCIN. Currently, it is estimated that there are approximately 10 million tuberculous patients per year in the world, and 5% or 500,000 of those patients have multidrug-resistant tuberculosis. KANAMYCIN is effective against multidrug-resistant Mycobacterium tuberculosis. We have been supplying approximately 140,000 patients with KANAMYCIN through a United Nations project called the Stop TB partnership since 2011. The goal of this project is to bring an end to this global epidemic. To achieve this, the project plans to improve access to pharmaceuticals in remote areas of Asia and Africa. We are also working to obtain data by 2020 to show that KANAMYCIN can be stored for more than 5 years, even in hot and humid conditions. We shall continue to provide a stable supply of high quality pharmaceuticals to help stop tuberculous.

Topics
- Medreich Contributes to Medicine Access Through UNICEF

Medreich Limited is a contract manufacturing organization (CMO) and contract development and manufacturing organization (CDMO) conducting pharmaceutical-manufacturing business in India. The company manufactures generic drugs and sells them to markets worldwide, including Europe, Asia, Africa and Oceania. Medreich plc is a sales company based on U.K. which sells pharmaceutical products manufactured in Medreich Limited mainly for EU market. Medreich plc supplies the antibiotic Amoxicillin to UNICEF. Medreich will continue to contribute to children's access to medicine through UNICEF.

*UNICEF: United Nations International Children's Emergency Fund
Measures Against Infectious Diseases

Appropriate Use of Antibiotics

Since the development of penicillin in Japan in 1946, our Pharmaceuticals segment has been involved in development, manufacturing, and sales of drugs against infectious diseases, mainly through the sale of ethical pharmaceuticals.

In addition to antibiotics for bacterial pathogen of infectious diseases, we have an extensive lineup of products ranging from prevention, diagnosis to treatment, including vaccines to prevent infectious diseases, antiseptics, and diagnostic test kits. We also provide information to the healthcare professionals and educate medical institutions about proper usage.

New Drug Research and Development

Due to a recent rise in microbes resistant to conventional antibiotics, the international community has been confronted with a major concern on how to counteract antimicrobial resistance (AMR). We have been researching and developing antibiotics for many years, and we are committed to finding a solution to counteract AMR.

Approach

Our competitive edge in R&D is attributed to our long experience and involvement in antibiotics research, and has earned us the deep trust from medical institutions. We have amassed a huge amount of data collected from drug sensitivity testing for resistant strains of bacteria, which medical institutions sent to us. We promote R&D based on the practical needs at hospitals, because we stay informed on the latest trends involving infectious diseases.

We dedicate more resources to R&D on \(\beta\)-lactamase (bacterial enzyme that breaks down antibiotics such as penicillin and induces drug resistance) in response to the growing needs of medical institutions for drugs counteracting resistant bacteria. We have successfully discovered ‘nacubactam’ (development code: OP0595), which, in combination with \(\beta\)-lactam antibiotics, restores or extends their ability to treat bacterial infections caused by beta-lactamase producing antibiotic-resistant strains.

The Phase I clinical trials have been completed in the United States. At the same time, Meiji’s \(\beta\)-lactamase inhibitor OP0595 project, entitled "Development of a novel \(\beta\)-lactamase inhibitor, OP0595, as a single drug utilizing a new rapid genetic diagnosis and non-clinical PK/PD theory" has been adopted by Japan Agency for Medical Research and Development (AMED) grant for ‘Cyclic Innovation for Clinical Empowerment (CiCLE)’. The Phase I clinical trials are conducted in Japan. We expect that this new candidate will combat AMR, and we shall continue to carry out our social responsibilities through revolutionary drug discovery.
Quality and Safety

SDGs

Social Issues

Ensure Product Quality and Safety

KPI

Obtain Global Food Safety Initiative (GFSI) certification, which includes Hazard Analysis and Critical Control Points (HACCP) for all domestic food plants by FYE March 2021

Safety System Initiatives for Trusted Quality, Brand Recognition

Food Segment

Quality Control

The Meiji Group provides high-quality, safe products and services to meet customer expectations for related health and reliability. Through these efforts, we will improve the lifestyles of our customers. Based on our Corporate Behavior Charter, the Meiji Group strives to improve the quality of our products through quality assurance systems developed in house, tailored to the specific characteristics of each business operation. Meiji Co., Ltd. has established an original quality management system, which includes Quality Policy, Quality Assurance Regulations, and Quality Assurance Standards. Each functional division (development and design, procurement, manufacturing, logistics, and sales and communications) conducts operations based on the Quality Policy. Quality Assurance Regulations stipulate important items for maintaining quality, and Quality Assurance Standards detail specific duties and assessment criteria.

The Food segment has adopted Meiji Quality Communication, conducting stringent quality control under an integrated system spanning raw material procurement through sales.

Our hygiene control system covers all domestic food plants, and is based on the Hazard Analysis and Critical Control Point (HACCP). We intend to obtain Global Food Safety Initiative (GFSI) certification for all domestic food plants by FYE March 2021.

We test products through various means, including physical and chemical tests, before shipment. Through a range of tests, we check whether products have been manufactured in accordance with established procedures.

Quality Policy

We intend to widen the world of Tastiness and Enjoyment to meet all expectations of Health and Reassurance, providing our customers with Promised Quality and offering shared value. As Food and Health professionals dedicated to food quality and safety, our responsibility is to meet customer expectations according to three central principles:
1. We promise to enforce strict quality assurance at every step in our food chain, implementing the best system possible in each division and product to ensure Promised Quality.

2. We promise to maintain a close relationship with our customers and respond immediately to customer inquiries, questions, and concerns. We will maintain the trust of our customers by striving to understand and satisfy their expectations.

3. We promise to comply with all applicable laws and regulations, providing safe, high-quality products and services.

Quality Assurance Advancement System

In the Food segment, the Meiji Quality Comm Review Meeting leads quality assurance advancement activities. Held biannually and chaired by the president and representative director of Meiji Co., Ltd., the meeting checks the progress of quality-related initiatives and discusses measures to address issues. Further, the Food segment’s Meiji Food Safety Committee is chaired by the Director of the R&D Division and discusses a wide range of topics approximately twice a year. The committee invites experts in such fields as food chemicals and microorganisms to identify and reduce food risks.

Also, in the Food segment, members of one of the specialized teams from our Quality Division audits compliance with Quality Assurance Regulations according to a prepared checklist. These audits identify issues and improve our quality assurance capabilities.
Working With Suppliers for Consistent Quality Management

We work with suppliers to prevent quality defects and risks arising from raw ingredients or equipment. In the event of an issue, we perform a detailed investigation and share information, striving to prevent the recurrence of any similar problems.

Quality Audits by Internal Expert Teams

Teams of experts from our Quality Management Division perform quality audits based on detailed checklists. These audits ensure strict compliance with quality assurance regulations and other rules. The goal of these audits is to identify issues and improve our ability to assure quality. During FYE March/2018, we performed audits within Meiji Co., Ltd. and group companies inside and outside Japan. Auditors shared quality assurance information from Japan at overseas plants, being considerate of local customs and culture.

Incorporating Customer Feedback Into Quality Assurance Activities

We have established special divisions to analyze customer feedback. We have a monitoring system in place to capture customer feedback, particularly comments that could indicate health hazards. These divisions respond rapidly to feedback requiring an urgent response, performing cross-division confirmation and analysis of information.

Internal Quality Training

Meiji invests considerable time and effort in human resources training to improve quality levels. We hold seminars for both manufacturing and sales staff.

Quality Improvement Activities for Improved Production Floor Competence

Each production plant engages in quality improvement activities to reduce mistakes, process errors, and other issues, as well as to improve competence on the production floor. During FYE March/2018, a total of 211 teams from throughout our group companies conducted quality improvement activities.
Quality Management Based on Reliability Assurance Systems

Pharmaceutical Segment

Reliability Assurance for Pharmaceuticals and Medical Devices

The Pharmaceutical segment’s Reliability Assurance Policy assures the reliability of pharmaceuticals and medical devices. This policy states, “We will contribute to society by earning the trust of patients and healthcare professionals.” Accurate information is essential for the appropriate use of pharmaceuticals. We make available to users all information relevant to our products, which we obtain during product development, clinical studies, and post-marketing surveillance. Based on the Reliability Assurance Policy, we have established the Reliability Assurance Guidelines. Based on these guidelines, we do our best to enhance the reliability of our products and activities.

Reliability Assurance Guidelines and Reliability Assurance System

The Ministry of Health, Labour and Welfare in Japan enforces stringent standards for all aspects of pharmaceuticals, from R&D, manufacturing, and shipment to the gathering of information on adverse reactions and the provision of information on proper use. At each operational stage, we have established original standards and manuals with adherence to laws and regulations. We ensure the reliability of data and information through rigorous efforts to conduct appropriate tests and gather accurate data. The Reliability Assurance Policy also applies to group companies.

The Reliable & Quality Assurance Division ensures reliability by conducting internal audits, as required, in compliance with standards and policies based on the Reliability Assurance Policy. The Reliable & Quality Assurance Division is independent from R&D, production, and sales divisions. In this way, we have established a system that ensures reliability through objective assessment.

We have established Operational Rules of Quality Management Review. This is a system that achieves continuous improvement through plan-do-check-act cycles aimed at ensuring, and enhancing, product reliability.

Based on the Quality Assurance Policy, the Pharmaceutical segment ensures quality globally. In these activities, we assure quality across the entire supply chain, from raw material procurement and manufacturing to distribution and the post-marketing gathering of information on side effects. For example, we visit our own plants, and those of manufacturing subcontractors and raw material suppliers in Japan and overseas to ensure the quality of our pharmaceuticals. Pursuant to relevant laws, an authorized person approves shipment to market after checking all manufacturing-related records. In this way, we provide pharmaceuticals that healthcare professionals and patients can use with complete confidence.

QMS: Quality Management System
GCP: Good Clinical Practice
GMP: Good Manufacturing Practice
GQP: Good Quality Practice
GVP: Good Vigilance Practice
GPSP: Good Post-marketing Study Practice
Quality Improvement and Personnel Development
We foster the ability of our employees to improve operations proactively. We hold meetings to share and discuss the achievements of quality improvement activities and engage in other activities to develop our personnel.

Response to Quality-Related Incidents
If a quality-related incident occurs, our head office collects quality information from plants, affiliated companies, and the respective divisions involved. This information is summarized and shared with senior management. We take any necessary measures and implement preventive measures as promptly as possible.

Extensive Disclosures on Quality and Safety
We make timely and appropriate disclosures of information related to high-quality, safe products and services, striving to ensure the trust and satisfaction of our customers and patients.

Approach

Disclosures on Our Corporate Websites
We disclose frequently asked questions on our Food segment website. We make timely updates to this content based on popular topics.

Disclosures on Product Quality Assurance

Link

Quality in Pharmaceutical Segment

Flow of information
Value-adding activities
The Meiji Group research and development is conducted in compliance with relevant laws, policies of the relevant ministries and agencies, and internal rules for product quality, efficacy and safety.

The Food segment will not fund, conduct, or commission any tests on animals for health claims that are not required by law.

The Pharmaceutical segment creates plans that focus on animal protection and welfare, when implementing animal testing. Experiments are based on the 3Rs principle of reduction: using fewer animals; replacement: seeking experiments that do not use animals; and refinement: mitigating animal suffering. We conduct animal testing after receiving approval from a laboratory animal ethics committee.

The Pharmaceutical segment receives accreditation from the Japan Health Sciences Foundation (JHFS).
Caring for the Earth

SDGs

We are fully aware that our business operations depend upon the bounty of nature. We strive to conserve resources, protect the environment, and contribute to a more sustainable society. The Meiji Group is committed to reducing the environmental impact of our business activities. We conduct business operations in accordance with our Environmental Philosophy and Environmental Policy, which aim for harmony with the environment.

Reduce total domestic CO2 emissions by more than 15% compared with FYE March 2014 baseline by FYE March 2031

Environmental Philosophy

Recognizing that our business operations originate from the bounty of nature, the Meiji Group will contribute to the creation of a sustainable society. To this end, we intend to harmonize our business activities with the global environment and manage the group in a way that protects the environment.

Approach

Environmental Management

Food segment and Pharmaceutical segment conduct environmental management through environmental committees comprised of representatives from related departments. Established in 2016, the Meiji Group Environment Meeting monitors the progress of each company’s environmental measures and reports to the Group CSR Committee.

* Calculation parameters
Scope: Meiji’s and Meiji Seika pharma’s plants and research centers, respectively.
(1) Totals were calculated based on environmental accounting standards prepared in accordance with the Environmental Accounting Guidelines of the Ministry of the Environment.
(2) Costs include depreciation and amortization, personnel expenses, utility costs, repair costs, and other costs.
(3) Depreciation and amortization was calculated by identifying environmental equipment and facilities in the fixed asset ledger and using their statutory useful life.

Reduce CO2 Emissions

KPI

Reduce total domestic CO2 emissions by more than 15% compared with FYE March 2014 baseline by FYE March 2031.

Energy Conservation Measures

We strive to conserve energy and resources by installing energy efficient equipment, improving existing production equipment, and converting to energy sources with lower CO2 emissions.

Approach

Energy Consumption and CO2 Emissions

We are working to conserve energy and reduce CO2 emissions during production by converting from heavy oil to municipal gas. We also make use of in-house cogeneration systems that utilize waste heat efficiently.

Climate Change

Topic

We converted Kyushu Plant in Food segment from heavy oil to liquefied natural gas (LNG) satellite equipment and high-efficiency gas boilers. This conversion has reduced CO2 emissions by 900 tons per year.

Topic

We upgraded the once-through boiler* at Pharmaceutical Research Center in Pharmaceutical segment to a high-efficiency unit, saving 200 tons of CO2 emissions annually (FYE March/2017).
* Equipment that creates a heat source (steam, hot water) by using fuel to heat water.

Eco-Friendly Logistics via Modal Shifts and Double-Deck Trucks

At Meiji, we strive to reduce our environmental footprint in materials procurement, product delivery, and other logistics operations. We have introduced modal shifts and double-deck trucks to transport products of differing temperature zones on a single vehicle.

Changeover to Low-Emission Vehicles; Fleet Reductions

We began changing our delivery trucks and sales vehicle fleets to eco cars in FYE March/2013. We have also cut down the size of our sales vehicle fleet.

Renewable energy

Approach

Solar Power Generation at Meiji Production Plants

We use renewable energy to reduce CO₂ emissions. Osaka Plant, Aichi Plant, and Santa Ana Plant in Food segment have installed solar panels.

Results

FYE March 2018

Osaka Plant
Power generation volume: 237,568 kWh (power generation capacity: 200 kW)
CO₂ reduction volume: 120.9 ton

Aichi Plant
Power generation volume: 978,679 kWh (power generation capacity: 750 kW)
CO₂ reduction volume: 474.6 ton
Generating Electricity via Bioenergy

In addition to the use of activated sludge processing at Sakado Plant and at Meiji Chewing Gum Co., Ltd., we are incorporating discharged water treatment technology that utilizes methane fermentation*. We use methane gas as a fuel for boilers.

* Methane fermentation treatment method - Treatment method that uses anaerobic microorganisms (absence of oxygen) to break down organic solids in discharged water, converting them to methane gas and CO2.

Carbon Emissions Trading

We use renewable energy sources (solar power, etc.) and adopt the carbon emission trading system to reduce greenhouse gases, a contributor to climate change.

Improved Environmental Data Management

We continue to improve our environmental data management system, which provides evidence of our initiatives dealing with climate change and global warming. In addition to consolidated group data collection and disclosure, we have an independent entity draft group management standards and perform audits to verify our environmental management system operations, as well as improve our data transparency and reliability.

Improved CO2 Management System

In addition to acquiring data from our worldwide operations, we are considering whether to adopt global management standards and environmental data management systems.

Disclosure of Scope 1, 2, and 3 data

Scope 1, 2, and 3 data
Independent Practitioner’s Assurance of CO2 Emissions

In order to improve the reliability of the data, we obtained the independent practitioner’s assurance for the domestic CO2 emissions (Scope 1 and 2) of FYE March 2018 indicated on p.36 in the Integrated Report 2018 by Deloitte Tohmatsu Sustainability Co., Ltd. We will work hard to improve the reliability of all environmental data.

- Results of the Domestic CO2 Emissions (Scope 1 and 2) in FYE March 2018 (PDF:14511KB)
- Independent Practitioner’s Assurance Report (PDF:14511KB)

Eliminate the Use of Specified Fluorocarbons

KPI

Eliminate the use of specified fluorocarbons in air conditioners and large-scale facilities in Japan by FYE March 2036.

Switch to Alternative Fluorocarbons and Natural Refrigerants

We are moving our large-scale facilities to natural refrigerants (ammonia, etc.) as an alternative to specified fluorocarbons (R22, etc.) used widely in air conditioners today.

Approach

Switch to Alternative Fluorocarbons and Natural Refrigerants

Kyoto, Gunma and Kyushu Plants in Food segment have adopted natural refrigerants, reducing CO2 emissions as a result.

FYE March /2016 Kyoto Plant CO2 reduction
Volume : 472 ton
FYE March /2016 Gunma Plant CO2 reduction
Volume : 199 ton
FYE March /2016 Kyushu Plant CO2 reduction
Volume : 36 ton
Circular Economy

SDGs

Social Issues

</tr>
</tbody>
</table>

Addressing Food Loss and Waste

Food loss is defined as otherwise consumable food that is thrown out by food processors, retailers, food service industry entities, households, etc. Annual food loss is estimated to be 6.46 million tons in Japan alone in FYE March/2016. The Meiji Group acknowledges our own large volume of food loss as part of a larger social issue. We are working with our national government and trade organizations to introduce new policies (below).

Approach

Reduce Bad Inventory Through Improved Supply Forecasts

We are encouraging sales and production division to communicate better. At the same time, we are developing supply forecasts by product, reflecting past sales data and sales promotion plans. As we improve supply forecasts day by day, we limit bad inventory and reduce food loss.

Best-Before Date Changed to Month-Year Label

By changing food expiration labels from year-month-date to year-month formats, we expect to reduce food loss and encourage logistics efficiencies across our entire supply chain as our manufacturing, logistics, and sales teams work more closely together. The best-before date of all products (except gummy and snacks in our confectionery business) will be changed to a month-year label.

Extending Expiration Dates for Certain Items

We plan to extend the expiration dates of certain food items whose quality will not be affected (confectioneries, drinks, nutrition foods, prepared foods, etc.). In so doing, we will reduce wasted stock of expired items.
Results

【Confectionery Business】
Chelsea Scorchassort ⇒ Extended from 12 months to 15 months (beginning April 2015)
Cough drops warm ginger ⇒ Extended from 12 months to 14 months (beginning September 2016)

【Nutritionals Business】
Meiji Mei Balance Mini cup ⇒ Extended from 6 months to 12 months (beginning May 2015)
Meiji Mei Balance Mini ⇒ Extended from 6 months to 9 months (beginning October 2016)
Meiji Aquapack Na ⇒ Extended from 6 months to 12 months (beginning May 2017)
Meiji Mei Balance Rehasupport Mini ⇒ Extended from 6 months to 9 months (beginning December 2017)

Revising the 1/3 Rule Across the Logistics Industry

We are working with trade organizations to revise the traditional 1/3 rule for delivery deadlines.

Collaborating With Society

The Meiji Group is working with food banks to reduce food loss.

3Rs (Reduce, Reuse, Recycle)

We focus on environmental friendliness throughout the product life cycle, from planning through disposal.

Approach

Reducing the Environmental Impact of Packaging

Food segment conduct a Paper Drink Carton Recycling Campaign twice per year. The purpose of the campaign is to remind employees of the importance of sorting and recycling paper cartons. Recycling collection boxes are set up, and employees are encouraged to dispose of their paper milk cartons appropriately. Each year the percentage of employees participating increases. At present, approximately 85% of employees participate in the campaigns.

3Rs for Home-Delivery Milk Bottles

Food segment delivers milk to approximately 2.6 million homes in Japan. The returnable milk bottles used for home delivery must be light and strong so they can be used multiple times. We have recently improved our bottles to make them even stronger and lighter. The weight for a 200 ml bottle has been reduced to 180g, while durability has been increased to allow for three times as many uses. If bottles become scratched they can be crushed for use as raw materials for new bottles.
Zero Waste (Zero Emissions)

We pursue a Zero Waste (Zero Emissions) policy based on the 3Rs.

Circular Economy

Reduce Final Disposal Volume

The Meiji Group strives to protect the Earth's finite natural resources by reducing waste and using resources efficiently.

Approach

Reducing Production Plant Waste

Food segment is working to reduce waste in every production plant.

Results

Food segment has reduced production waste by an annual 24 tons by changing to intermittent nozzle operation in biscuit dough mold release oil equipment (Galbo chocolate snacks).

Environmentally-Friendly Products

We are minimizing containers and packaging to eliminate waste of precious resources.

Results

Meiji Probio Yogurt, Drink Type

We are reducing the weight of PET bottles for this product. We reduced PET plastic volume by approximately 26% per bottle compared to bottles used prior to the integration of new facilities.
Chocolate Snacks: Kinoko no Yama, Takenoko no Sato
Reduced the thickness of internal packaging by 5 μm, reducing resource usage volume by approximately 9% and annual use by 7.5 tons.

Chocolate Snacks: Galbo Pocket Pack
We reduced packaging volume by approximately 25%.

Waste Recycling

Kyushu Plant in Food segment concluded a contract with a local municipal authority in 2013. Under this contract, raw garbage is collected from the plant and fermented at the municipal authority’s biomass plant to produce methane. The methane is then used for gas-fired power generation. And dregs from fermentation are used as fertilizer. We donate some of the money saved through this project to promote the local area’s agriculture.

Appropriate Chemical Substance Management

We strive to reduce chemical emissions. Measures include equipment to absorb vaporized chemicals, switching to safer substances, and improved manufacturing methods that reduce or eliminate chemical substances.

Approach

PRTR Substances

We report chemical emissions and transfers in accordance with Japan’s Pollutant Release and Transfer Register (PRTR) Act.
At Pharmaceutical segment each pharmaceuticals plant and research center has a chemicals management committee that sets standards for handling chemical substances. The company manages procurement and inventory volumes, checks emission and transfer volumes, and strives to reduce emissions.

Appropriate Management of Chemical Substances

PCB Management

Each of our operating bases engages in the appropriate management of transformers and capacitors that contain polychlorinated biphenyls (PCBs).
Water

SDGs

Social Issues

Secure Water Resources

KPI

Reduce domestic water use volume (base units) by more than 20% compared with FYE March 2016 baseline by FYE March 2031.

Approach

Reduce Water Consumption via Appropriate Water Management and Water Conservation Equipment

We are constantly working hard to save water and reduce its footprint in the environment from our water intake. We have revised our production processes to enhance our water-use efficiency and are also working to recycle water.

Improving Wastewater Quality Through Appropriate Chemical Substance Management

We have set more stringent standards for discharged water than the legal standards in Japan, and we are working on preventing water pollution. In order to reduce our environmental footprint of discharged water, we install equipment that uses activated sludge treatment and methane fermentation at plants or for processes that discharge a lot of water.
Survey of Water Risks

We assess the water risks in all areas where our domestic and international production sites are located in order to understand the impact of water usage on production. For this assessment, we use AQUEDUCT, an international water risk assessment software launched by the World Resources Institute (WRI). We also collect information and develop specific measures for the site.
Biodiversity

SDGs

Social Issues

Secure Local Biodiversity

Secure Local Biodiversity

KPI

Conduct biodiversity activities at all domestic sites with production plants by fiscal year 2020

Biodiversity Conservation

As the Meiji Group depends upon the bounty of nature, we undertake various environmental conservation activities. We promote biodiversity activities in consideration of local ecosystems at all sites inside and outside Japan that have production plants.

Approach

Promote Biodiversity Activities at all Domestic Sites with Production Plants

Environmental Communications

The Meiji Seika Pharma Gifu Plant provides environmental education for elementary school children. We explain our environmental conservation measures and give production plant tours highlighting our environmental facilities to enhance their understanding of environmental conservation.
Conduct Biodiversity Activities at Overseas Sites with Plants

PT. Meiji Indonesia plants productive trees in water catchment areas on the mountain slopes around the Pasuruan regency.

We at Medreich celebrated the world environment day with purpose and to create more awareness on the environment. Across the locations environment protection related banners were displayed. Saplings were planted by employees to mark the importance of this very significant day. Posters were created, and employees were issued badges, environment tip cards. Employees were also encouraged to give environment related speeches to spread their knowledge on saving
environments. Along with the above, Employees took Oath at every location for protecting Environment.

**Biodiversity Conservation in the Nemuro Nature Conservation Area**

Meiji concluded an agreement for the conservation of wild birds with the Wild Bird Society of Japan in 2007. Based on this accord, we jointly established a bird sanctuary in the Nemuro Nature Conservation Area, which we own (467ha) for nature restoration. This conservation area is located in Nemuro City, Hokkaido. Our employees provide volunteer work hours here to protect the environment, and the area is also used for the environmental education of local residents. The Nemuro Nature Conservation Area is host to *Grus japonensis*, *Himantopus himantopus himantopus*, *Haliaeetus albicilla albicilla*, *Haliaeetus pelagicus* and other endangered wild birds noted on the Red List*.

*Japan's Ministry of Environment evaluates the risk of extinction for various wild animals native to Japan. The ministry publishes a Red Data Book listing these animals and their circumstances, categorized by plant and animal species.

- *Grus japonensis*
- *Haliaeetus albicilla albicilla*
- *Himantopus himantopus himantopus*
- *Haliaeetus pelagicus*
A Richer Society

SDGs

We contribute to a richer society through communication and cooperation with stakeholders.

Human Resources

SDGs

Social Issues

Promote Diversity and Inclusion, and Provide Training to Employees

Employee-Friendly Workplaces

Promote Diversity and Inclusion, and Provide Training to Employees

KPI

Combined stand-alone numerical targets for Meiji HD, Meiji, and Meiji Seika Pharma include:

1. Aim to raise the ratio of female managers to greater than 10% by FYE March 2027 from 2.6% in FYE March 2018

2. Raise the ratio of employees with disabilities above the statutory employment quota

Approach to Human Resources

Our approach to human resources is to foster personnel who set innovative and ambitious goals for themselves, achieving these goals by drawing on their expertise and the group's strengths. In other words, our goal is to develop individuals who embody the Group Philosophy and the meiji way, practicing our Action Guidelines.
Evaluation and Development of Personnel

Our basic approach to personnel evaluation focuses on employee contributions to the development of the group as a whole. We manage organizations and human resources based on employee abilities and duties. We encourage employees to take on more challenging duties so they can grow and achieve more in their work.

Giving employees opportunities to think about the ways in which they work encourages them to adjust their behavior and strengthen their professional capabilities. Rather than evaluate individual achievements, we view achievements as steps in a larger process. This approach allows employees to identify areas for improvement, and to grow and take on more challenging tasks in the future.

Our evaluation system is designed as a holistic tool that not only evaluates personnel, but also encourages professional growth.

Diverse Employees

Our Corporate Behavior Charter calls for respect for the diversity of employees. Further, the Meiji Group Policy on Human Rights declares zero tolerance for discrimination.

We operate more than 30 Group companies in Japan and more than 20 overseas. In Japan and overseas, many different employees contribute to operations in a range of workplaces. The diversity of our workforce encompasses nationality, gender, and age. Our workforce includes people with disabilities, regional employees, fixed-term employees, and employees with childcare or nursing care commitments. We will develop our human resources system and workplace conditions so each individual is motivated and finds fulfillment.

We cultivate solidarity among group companies worldwide, holding Group Philosophy briefings overseas and issuing a Group newsletter featuring events in Japan and overseas. Moreover, employees of overseas group companies participate in study tours at plants and research laboratories in Japan. We also conduct personnel exchange training among overseas and domestic employees.

Empowerment of Female Employees

We empower female employees by helping them meet work and family commitments, while encouraging women to take on diverse jobs. The aim of these efforts is to improve our corporate competitiveness.

In fiscal 2017, more than 200 employees registered for childcare leave. In addition, more than 200 employees returned to their jobs and used a reduced working-hour system to meet parenting responsibilities. The Meiji Group is creating an environment in which employees maintain their professional abilities while entering new life stages.

We intend to increase the number of female leaders by hiring more women, offering career advancement training, and providing job rotation.

### Support for Childrearing

**Prenatal leave**
- Available immediately after becoming pregnant

**Child-nursing leave**
- 5 days per year available until child starts elementary school

**Support for childrearing**
- When employee or spouse gives birth
- Special payment for birth
- Nursery items

**Next-generation childrearing allowance**
- Available until employee's son or daughter reaches the age of 20
Benefit association

- Special payment for birth
  50% of amount used for babysitter services (not exceeding 30 days)
- Special payment for school enrolment

Child Care Leave

Employment of Persons with Disabilities

We meet the statutory employment rate for people with disabilities. Moreover we create workplaces that allow employees to fully realize their capabilities regardless of disabilities. Our numerous employees with disabilities work at more than 40 bases around Japan. Wheelchair ramps and barrier-free lavatories make it easier for people with disabilities to work for us.

Employees Rate for People with Disabilities

Retiree Reemployment

After reaching the retirement age of 60, our employees have the option of continuing to work up to the age of 65. Reemployed personnel guide and lead young employees, setting a good example. Since 2010, every applicant has been approved for reemployment.

Number of Seeking Reemployment

Personnel Development

The Meiji Group has created a basic policy concerning skills development, and the company provides a skills development structure to foster human resources.

Basic policies for developing the capabilities of personnel

To achieve the Long-term Vision laid out in the Meiji Group 2026 Vision, we will:
1. Develop personnel who have the proactive mindset, as well as the expertise, creativity, and practical skills, needed to take on and achieve ambitious targets
2. Spur group expansion by growing individuals and developing independent-minded personnel who raise groupwide capabilities
3. Develop personnel who fully understand the Group Philosophy and put the meiji way into practice at an advanced level

| Life plan training | Training for employees at the age of 50, 59 |

**Approach**

**Manager Development**

Directors, Audit & Supervisory Board members, and executive officers receive opportunities to better understand their roles and duties. This training includes legal responsibilities, corporate governance, compliance, and risk management. If necessary, these individuals are provided with information about Meiji Group businesses, organizations, financial status, and so on. Outside directors and outside Audit & Supervisory Board members are given information about Meiji Group management strategy and the nature and status of the company's businesses. These individuals are provided opportunities to observe factories, research centers, and other facilities. Newly appointed executives receive necessary training from external organizations.

**Rank-Specific Training, Business Skills Training at Each Career Stage**

Systematic training for Meiji Group employees starts with new-employee training, where employees learn the basic knowledge, behavior, and attitudes they need for work at Meiji. Next, employees receive training in logical thinking, follow-through, team-leadership skills, and the qualities and capabilities of a business leader. Managers receive training at each relevant stage, helping them reflect on their management style and strengthening their ability to foster their subordinates. Training for upper management is designed to enhance management skills to make the workplace more dynamic and to cultivate an awareness of self-reform as participants seek to become management leaders.

**Training Program for the Development of Personnel Capable of Working Globally**

We provide a wide variety of training programs to develop personnel capable of working globally.

1. Self-development language courses
2. Language training in English- and Chinese-speaking countries for effective language-learning and understanding of different cultures
3. Programs sending selected personnel to business language schools to acquire practical language skills
4. Programs to instill perseverance, understanding of diversity, and mental toughness by sending personnel overseas to gain first-hand experience in business customs under challenging conditions

**Personal Development Training**

We provide motivated employees with opportunities for personal development on an applied-for basis. This program supports employees who wish to develop their abilities.

**Employee Self-Assessment System for Career Planning**

Under our self-assessment system, employees meet with a superior once a year to talk about the volume and quality of their work, their aptitudes, career plans, and related topics. This meeting is an opportunity for employees to think about their work style and career path. For the company, this meeting is a chance to learn the employee's ideas and situation. Based on these meetings, the company considers ways to best use and foster individual employees.

**Employee-Friendly Workplaces**
Encourage Personal Health Management

Meiji Group Declaration on Health Management

The Declaration on Health Management is our statement of policy for managing employee health. This Pledge apply to domestic Meiji Group companies and their officers and employees.

Promotion system

The Meiji Group promotes health management, mostly through the Health Management Promotion Committee, comprised of the company and its health insurance society.

Pledge of Health and Productivity Management

Mental and physical health are fundamental to our employees and their families in enriching employee lives and allowing them work to their full potential. Mental and physical health are also fundamental to the company to increase productivity and corporate value. We at the Meiji Group aim to be a comfortable place to work, fostering dynamic employees who are healthy in mind and body.

1. Employees mindfully manage their own health and the health of their families.
2. The company actively supports employees as they work to build on their health management capabilities.
3. The company endeavors to establish a workplace where employees can work in confidence, physically and mentally.

Approach

Promoting Employee Health

Promoting employee health is one of our corporate responsibilities. We create vibrant workplaces through multifaceted support for employee health.

1. Increasing the percentage of employees who have health checkups and preventing lifestyle-related diseases through post-checkup health guidance.
2. Providing employees with support through occupational health doctors or other highly experienced specialists, and providing support systems for employee physical and mental health concerns.
3. Developing working environments that discourage long working hours.
4. Stress checks

Second Straight Year as a Certified Health and Productivity Management Organization (White 500)

Our initiatives for employee health (checkups, health guidance, mental health care, exercise habit support, etc.) have won acclaim. Meiji Holdings, Meiji, and Meiji Seika Pharma were chosen for the list of Certified Health and Productivity Management Organizations (White 500) for the second straight year.

Workstyle Reform

We are working to create an employee-friendly environment that enables employees to fulfill their potential and takes work-life balance into account.
Comfortable Work Environment, Diverse Work Styles
1. Implement work-at-home programs
2. Support male employees who wish to take childcare leave
3. Run programs to help employees continue their jobs during life events

Normalization of Work Hours
It is the responsibility of the company to create an environment that promotes employee health and vitality. To achieve this, we are working to reduce long work hours and promote the use of annual paid leave.
1. Mechanisms for individually reducing the working time of those who work long hours
2. “No-overtime” days (once per week)
3. Work-focus times, more efficient meetings
4. Encourage employees to take annual paid leave on continuous days (five days)
5. Monitor annual paid leave taken and follow up with employees who do not take paid leave

Employee Awareness Survey
We periodically take an employee awareness survey. This survey assesses workplace climate and energy level from various angles, revealing employee perceptions and issues to be addressed.

Occupational Health and Safety
The Meiji Group embraces the concept of “safety over everything,” which is a theme in our Policy on Occupational Health and Safety. We work continuously to ensure workplace safety and promote health maintenance and improvement among employees.

Policy on Occupational Health and Safety
Management system
Each company in the Meiji Group has the Health and Safety Committee. This committee takes the lead in setting yearly targets and following the PDCA cycle to take initiatives suited to the business and operating base.

Approach

Reducing Equipment- and Work-Related Risks and Performing Safety Audits and Inspections
The Meiji Group works with partner companies to reduce equipment- and work-related risks, ultimately eliminating occupational accidents and injuries. We also perform safety audits and inspections to prevent occupational accidents, injuries, and legal and regulatory violations at each operating base. In the event an occupational accident or injury does occur, we investigate the cause, carry out equipment safety inspections and countermeasures, and work to prevent recurrence.

Frequency Rate of Lost-worktime Injuries

Occupational Safety and Health Training at Each Business and Operating Base
The Meiji Group provides health and safety training suited to each business and operating base.

- Meiji Co., Ltd.
The company's Health and Safety Handbook covers laws, regulations, and the prevention of recurrence of past incidents. This book is used to train employees in occupational health and safety. Other training is designed to ensure that past incidents and lessons are not forgotten. This training is conducted at an internal training facility with panels displaying these incidents and lessons learned. The facility also provides and sensory equipment to experience safety.
Meiji Seika Pharma Co., Ltd.
Each operating base conducts workplace patrols and hosts safety patrols performed by health and safety staff from other operating bases. External consultants perform safety assessments. All operating bases share these results, which are also used for the occupational health and safety training of employees.

Meiji Co., Ltd. and Meiji Seika Pharma Co., Ltd. share information beyond across outside their immediate organizations to prevent similar disasters.

Labor Relations

Meiji Co., Ltd. and Meiji Seika Pharma Co., Ltd. have labor unions. These unions are coordinated through the Meiji Group labor union.

We believe that sound labor–management relations are crucial for effective corporate management. We engage with unions in regular labor discussions, wage negotiations, and health and safety discussions.

Each union employs a union shop system, meaning 100 percent of full-time (non-management) employees join the union.
Society

SDGs

Social Issues

- Respect and Promote Human Rights
- Communicate with Stakeholders
- Promote Social Contribution

Respect and Promote Human Rights

KPI

100% of employees* receive training on human rights

* New employees and those promoted to management positions for Meiji HD, Meiji, and Meiji Seika Pharma on a stand-alone basis

Human Rights Education and Training

We engage in education and training activities related to respect for human rights and prohibition of discrimination, prohibition of forced and child labor, prohibition of harassment, safe and healthy workplaces, respect for fundamental rights of employees, and more, based on the Meiji Group Policy on Human Rights.

Approach

In-company Training

In Japan, we provide internal training related to general CSR principles and human rights for new employees and those employees promoted to management positions in Meiji HD, Meiji, and Meiji Seika Pharma and employees of domestic group companies. Training is based on the Meiji Group Policy on Human Rights. We also conduct internal human rights training at overseas group companies.

Evidence

We provided training for 164 and 194 employees promoted to management positions in Meiji HD, Meiji, and Meiji Seika Pharma in FYE March/2017 and FYE March/2018, respectively.

We provided training for 211 and 237 new employees at Meiji HD, Meiji, and Meiji Seika Pharma in FYE March/2017 and FYE March/2018, respectively. (Cumulative 806 employees)

Employees at 22 domestic group companies received training in FYE March/2018 (Meiji: 478; Meiji Seika Pharma: 40)

Total of 1,300 employees
Initiatives Related to Human Rights Due Diligence

We conduct preliminary surveys and identify issues to prevent or reduce the negative impact of human rights problems related to our business activities at raw materials production sites or other locations (discrimination, exploitation, forced labor and child labor, unsecure labor environments, etc.). We use appropriate means to improve any human rights issues that may arise.

Evidence

Our human rights due diligence begin with measures related to the procurement of main raw materials:
- Cocoa
- Palm oil
- Paper raw materials

Policies

Communicate with Stakeholders

We take every opportunity and use every means to engage in communications with important Meiji Group stakeholders (our customers, employees, business partners, shareholders and investors, global environment, society). In this way, we answer the expectations of our stakeholders and fulfill our social responsibilities.

Approach

Communicate with Shareholders and Investors

We hold briefing meetings, IR events, and publish an informative IR website to keep our shareholders and investors up to date on the direction and strategies of the Meiji Group.

IR Activities

External Dialogues

We hold dialogues without outside experts, reflecting their opinions and recommendations in our vision, upcoming fiscal year plans, and business tactics.

Environmental Communication

Each plant and research laboratory conducts reporting seminars and study groups to highlight our environmental initiatives for local citizens, local governments, elementary schools, and middle schools. In addition to covering our initiatives for water and air pollution and CO2 reduction, we also listen to feedback to incorporate into future activities.

Communicate with Our Customers

Food Segment

Our Customer Service Center strives to ensure customer trust and satisfaction through prompt, honest, fair, and appropriate service. The center receives a wide range of inquiries regarding products and services. We use this customer feedback to develop new, and improve existing, products and services.

Approach

Customer Service Center

Our Customer Service Center uses a proprietary system to record and analyze customer feedback. The center strives to respond politely and provide useful information to allow customers ease of mind in using our products. The center also shares information with related departments to develop and improve products and services for greater customer satisfaction.

Evidence

Inquiries to the Customer Service Center by Subject  (FYE March 2018)
129,373 inquiries

Topic

Reflecting Customer Feedback to Improve Products

<Product> Frozen Food, Meiji Pizza & Pizza (2PC)
<Customer Feedback> Exterior back label (how to consume) is confusing.
1. Label on the back says remove the frozen "pizza" from the interior bag. However, the interior bag is clear; I almost put it in my microwave.
Customer Satisfaction Survey

We conduct an annual postcard questionnaire. The questionnaire postcards are sent to customers who have made inquiries to our Customer Service Center. Questions focus on satisfaction with the customer service and follow-up response received. Based on the questionnaire results, we implement improvements to ensure greater levels of customer satisfaction. For example, contacting the center is now more convenient, responses are more polite and attentive, and the time until responses has been shortened.

Survey Period: June 2017; Mid-November to Mid-December 2017
Respondents: 798
Response Ratio: 52.3%

Counseling Office for New Mothers

Meiji’s Counseling Office for New Mothers was established approximately 40 years ago. Managerial dieticians and dieticians at our counseling office offer valuable advice for new mothers, family members, and other persons engaged in childcare.

Evidence

Breakdown of Inquiries to the Counseling Office for New Mothers by Subject (FYE March 2018)
Adequate Labeling is for Customers Simple to Understand

The Meiji Group abides by the regulation and label products which is for customers simple to understand. The Meiji Group confirms the label on products adequate.

Drug Information Center

We have developed a system to make best use of customer feedback in the Drug Information Center. We provide attentive and high-quality responses to healthcare professionals, patients, their families, and caregivers.

System for using customer feedback

Evidence

Breakdown of Prescription Pharmaceutical Inquiries by Subject (FYE March 2018)
Improved aluminum sheet used for packing inhalation capsules
We incorporated patient feedback, changing the specification for cutting V-notches in the aluminum sheet to improve usability.

We develop new products to ensure greater levels of customer satisfaction.

Initiatives for Appropriate Information Disclosure
The Meiji Group complies with laws and corporate ethics in advertising and promotion activities, providing information based on fairly stated content and phrasing to prevent falsehoods or exaggerations. We conduct activities report based on our Pledge to be a customer-oriented company.

Promote Social Contribution

Promote Social Contribution

As a member of society, the Meiji Group incorporates a variety of CSR initiatives in our corporate behavior charter. We contribute to society by developing special infant formulas and drugs for rare diseases, as well as providing support for areas struck by disasters.

Approach

Social Contribution Activities in each Country, Region, Business Location

Participation in Local Cleanup Activities and Events
We are aware of our responsibilities as a good corporate citizen. Therefore, we regularly clean up and maintain the areas surrounding our facilities. Also, we actively participate in municipal authority activities and events aimed at beautifying local environments.
Shareholder Benefits

We offer a gift selection option for shareholder benefits. Shareholders have the option of donating an equivalent value of shareholder benefits to a charity organization, and the company matches this gift. In FYE March/2018, we donated a total of 12.04 million yen in chocolate, biscuits, and other items to 250 organizations (charities for Kumamoto Earthquake and Great East Japan Earthquake survivors, disabled children, etc.) through the Japan NPO Center.

Support for Disaster Areas, Developing Countries

We work in cooperation with NPO entities to provide support for recovery in the aftermath of the Great East Japan and Kumamoto Earthquakes.

Evidence

Disaster Area Support

The northeastern part of Japan was hit by a devastating earthquake on March 11, 2011, the Great East Japan Earthquake. In southern Japan, a strong earthquake centered in Kumamoto Prefecture in Kyushu occurred in the evening of April 14, 2016, followed by a second even stronger earthquake in the early morning of April 16, 2016. The Meiji Group gives donations, infant formula, confectioneries, and other items to those in disaster areas. Other support activities include holding such events as nutritional seminars to maintain the health of evacuees. The Meiji Group participates in the support projects of the Reconstruction Agency. To support the restoration of the disaster areas of the Kumamoto Earthquake and the Great East Japan Earthquake, group companies held a market in the Meiji Group's head office building in January 2018. A total of 310 employees took part in the market in 2018. Seven volunteers cut grass around temporary houses and moved household valuables to safety near Mashiki, Kumamoto. Eleven volunteers helped prepare and clean up after a memorial event in Morioka, Iwate. We provided nutrition education to a total of 162 citizens in devastated areas in seven different seminars during the year.

Social Contributions Through our Products

We contribute to Society through development and manufacture of rare diseases drugs, and manufacture and stable supply of special infant formula.

Rare Diseases Drug for Dravet’s Syndrome Treatment, DIACOMIT®

Dravet’s syndrome is an intractable form of epilepsy occurring in infancy. The disease develops in one infant in every 40,000. The syndrome is a severe disease that has a major impact on patients and their families because it causes seizures, delays physical and mental development, and has a high mortality rate. As there was no effective drug for Dravet’s syndrome treatment available, We launched DIACOMIT® Dry Syrup (oral suspension) and DIACOMIT® Capsule in 2012. We make efforts to provide accurate and timely information on the effectiveness and safety of this drug to healthcare professionals for the correct dosage to patients. Patients, their families, healthcare practitioners, and the
government have high expectations for DIACOMIT®, and they regularly express their gratitude to us for the drug.

Voices

Meiji Group’s contribution for children with intractable diseases

Yushi Inoue, M.D.
Director of Hospital Shizuoka Institute of Epilepsy and Neurological Disorders
National Hospital Organization

A drug for the rare disease Dravet’s syndrome, DIACOMIT has been prescribed to approximately 500 children since launch in 2012. Covering all cases, we have collected high-quality post-marketing surveillance, a rarity for many drugs. Enlightenment tools have been developed to enable information provision that benefits illness understanding and treatment. Recently, I have the impression that it has become less difficult to manage the severe seizures associated with this illness, which may be attributable to the popularity of DIACOMIT.

Special formulas are vital to the lives of children with intractable diseases. We are grateful that the company is responded to social needs by continuing to offer these products.

Raising Awareness of Photodynamic Therapy (PDT) LASERPHYRIN® for Injection

Photodynamic therapy (PDT) is a topical treatment that entails the injection of a photosensitizing agent and the use of low-power laser light to irradiate lesions. The photosensitizing agent has a high affinity with tumors, and the laser light causes tumor tissue degeneration or necrosis. PDT is a treatment method that does not affect normal tissue and mitigates the physical impact on patients. We promote the combination of PDT LASERPHYRIN® for Injection and laser equipment for PD laser and PD laser BT.

Photodynamic therapy (PDT) LASERPHYRIN® for Injection was approved for indications of early lung cancer and malignant brain tumor treatment. This treatment was approved for indications of recurrent/residual esophageal cancer in 2015. Prior to this, there was no established standard therapy, and prognoses for this recurrent/residual esophageal cancer were not encouraging. We will continue to contribute to the field of medicine, promoting PDT and providing a stable supply of the drug and laser equipment.

Special Infant Formula Helps Save Babies’ Lives

We manufacture and sell special infant formulas for babies with a variety of metabolic disorders. Often, babies are born with congenital metabolism disorders (also known as inborn metabolism errors). These babies require special nutritional management using special formulas suited to their particular disorder. We are committed to the production and supply of these special formulas. We manufacture and supply 20 types of special formula for a variety of metabolic disorders. These products include officially registered formulas, as well as formulas designed for treatment of non-congenital
metabolic disorders. As a leading manufacturer of infant formulas, it is our responsibility to ensure the healthy development of babies. We will continue to utilize the technologies and expertise amassed through creation of our products to better fulfill this mission.

Donation

We want our business activities to benefit society. Every year, we donate a portion of our Meiji Milk Chocolate sales during January and February to a program that improves child refugee nutrition through the UN Refugee Agency (UNHCR). Between 2009 and 2018, we donated approximately ¥67.3 million from sales. We also support the activities of Japan Hospital Clowns Association, a nonprofit organization. This organization brings smiles to children fighting diseases, children's families, and others involved in the children's lives.

Procure Raw Materials With Consideration Toward Human Rights and the Environment

KPI

- **< Cocoa >**
  Improve traceability of cocoa
- **< Palm Oil >**
  Use 100% of RSPO (Roundtable on Sustainable Palm Oil) - certified palm oil by FYE March 2024
- **< Paper >**
  Use 100% of environmentally friendly paper raw materials by FYE March 2021

Procurement of Cocoa

The stable procurement of high quality cocoa beans is an important issue for us as the global demand for cocoa expands. We implement procurement with consideration toward human rights
and the environment, cooperating with suppliers in accordance with the Meiji Group Procurement Policy and the Cocoa Procurement Guideline.

**Approach**

**Initiatives in Accordance With the Cocoa Procurement Guideline**

Our cocoa procurement practices are mindful of human rights and the environment in keeping with the Meiji Group Procurement Policy and the Cocoa Procurement Guideline established in September 2018. These practices include legal and regulatory compliance in cocoa-producing countries and regions, securing a proper working environment respectful of human rights, maintaining ecosystems, partnering with the World Cocoa Foundation (WCF), and running Meiji Cocoa Support, our own farmer support program.

**Improve the Traceability of Cocoa**

We improve the traceability of cocoa through Meiji Cocoa Support, which is intended to improve the operating environment of cocoa farmers. We have expanded the program to eight nations: Republic of Ghana, Republic of Peru, Republic of Ecuador, Bolivarian Republic of Venezuela, The United Mexican States, Dominican Republic, Federative Republic of Brazil, and in 2017, the Socialist Republic of Vietnam.

**Procurement of Palm Oil**

Palm oil, taken from oil palm trees cultivated in the tropics, is widely used in food processing. We implement procurement with consideration toward human rights and the environment, cooperating with suppliers in accordance with the Meiji Group Procurement Policy and the Palm oil Procurement Guideline.

**Initiative in Accordance With the Palm Oil Procurement Guideline**

We formulated the Palm Oil Procurement Guideline in September 2018. We implement procurement in accordance with the Palm Oil Procurement Guideline.

**Shift to 100% RSPO-Certified Palm Oil**

Meiji Co., Ltd. joined the Roundtable on Sustainable Palm Oil (RSPO) in March 2016. We are aiming to shift to 100% RSPO-certified palm oil by the fiscal year 2023.

**Procurement of Paper**

Following the Meiji Group Procurement Policy and the Paper Procurement Guideline, we are working with our suppliers to procure paper raw materials for product and office use in ways that care for human rights and the environment.

**Expand Use of Environmentally Friendly Paper Through the Paper Procurement Guideline**

We formulated the Paper Procurement Guideline in September 2018. We implement procurement in accordance with the Paper Procurement Guideline. We are expanding the range of eco-friendly
papers (including paper with FSC®* or other certifications and post-consumer paper) that we use for product containers, packaging, printing, and copying. By fiscal 2020, we aim to use only eco-friendly raw materials for paper.

**Topic**

Products such as Meiji Oishii Gyunyu 900ml (a drinking milk product), company guidebooks, various reports, and products use eco-friendly FSC®-certified paper.

+FSC®: The Forest Stewardship Council. An independent non-profit that operates an international forest certification system to spread responsible forest management around the world.

**Link**

FSC®

**Supplier Assessment**

Our goal is to deliver safe and secure products. To this end, we follow the Meiji Group Procurement Policy to ensure the quality and safety of raw materials and packaging. We use a fair and transparent supplier selection process, and practice socially responsible procurement mindful of human rights, the environment, and other considerations. When beginning trade with a new partner, we confirm the raw material and packaging data provided by the supplier and perform quality analysis. We survey and audit the supplier manufacturing plant's production and quality assurance system, production control system, and the supplier's fulfillment of social obligations, including human rights and the environment. Suppliers must meet rigorous planning standards set by each Meiji Group company. In addition, we work with suppliers to improve any problems.

**Approach**

**Supplier Assessment in Accordance With the Meiji Group Procurement Policy**

To strengthen our response to CSR issues in the supply chain, we survey and check supplier consideration and initiatives with respect to human rights and the environment, based on the Meiji Group Procurement Policy.

**Evidence**

Companies audited in fiscal 2016: 185 (primary suppliers in Japan)
Companies audited in fiscal 2017: 98 (primary suppliers in Japan)

**Initiatives for Sustainable Procurement**

**Expanding Meiji Cocoa Support**

The stable procurement of high quality cocoa beans is an important issue for us as the global demand for cocoa expands. The Meiji Group supports cocoa-producing nations and farmers through the Chocolate and Cocoa Association in Japan, World Cocoa Foundation, and SMS-ECOM. In 2006, we began our own Meiji Cocoa Support program and have been deepening partnerships with cocoa-producing nations.

Lessons at cocoa farm
Support Cocoa Farmers Through Meiji Cocoa Support

Since 2006, the Meiji Group has supported the sustainable production of cocoa, working to improve the operating environment of cocoa farmers. Our employees visit cultivation sites to speak directly with cocoa farmers and confirm local needs before determining a support plan. We conduct seminars on cultivation technology and insect-pest control and supply seedlings to increase yield. Additionally, we support community and infrastructure development by building wells, donating school supplies, and supporting environment-friendly farming practices. We teach our own fermentation technology to promote the production of high-quality cocoa, which in turn increases farmer income.

Expanding the Scope of Meiji Cocoa Support

Evidence

Scope of initiatives (fiscal 2017)
Eight countries
Republic of Ghana, The United Mexican States, Republic of Ecuador, Republic of Peru, Dominican Republic, Bolivarian Republic of Venezuela, Federative Republic of Brazil, Socialist Republic of Vietnam

In 2017, we established a cocoa farm equipment bank as a joint investment with a local enterprise in Peru. This resource is stocked with cocoa farm equipment that farmers can borrow. This system reduces work for the farmers and the burden of initial investment and maintenance costs for equipment, allowing farmers to concentrate on production with confidence.

Tackling Deforestation in our Cocoa Supply Chain

The governments of Côte d'Ivoire and Ghana and the world's leading cocoa and chocolate companies signed landmark agreements in November 2017 to end deforestation and promote forest restoration and protection in the cocoa supply chain. This new public-private partnership – called the Cocoa & Forests Initiative (CFI) – has been organized by the World Cocoa Foundation (WCF), IDH - the Sustainable Trade Initiative, and the Prince of Wales's International Sustainability Unit (ISU). The Prince of Wales launched CFI in March 2017 in London. Thirty-three companies, accounting for about 85% of global cocoa usage, have joined CFI. We implement an initial action plan from one part of Meiji Cocoa Support that spells out the specific actions it will take in 2018-2022 to deliver the commitments set out in the Framework. The Meiji's Cocoa & Forests Action Plan focuses on three pillars: forests protection and restoration; sustainable cocoa production and farmers' livelihoods; and community engagement and social inclusion.

Drinking Milk Value Enhancement Campaign

The Current State of and Issues Facing the Japanese Dairy Business
Dairy farmers in Japan are aging and their numbers are decreasing. At the same time, dairy farming is hard work, and farms face a lack of successors. Drinking milk is an excellent food providing a convenient source of good quality protein and calcium; however, the diversification of drinking beverages is leading to a decline in the consumption of drinking milk.

Drinking Milk and Dairy Products Created Through Cooperation with Dairy Farmers

Raw milk, the raw material used to make drinking milk, is milked from healthy cows. The quantity and quality of raw milk is greatly influenced by temperature, humidity and feed. Our dairy managers work closely with local farmers and agricultural cooperatives to ensure stable access to high-quality raw milk. Hygiene is critical to the production of good-quality raw milk.

In 2009, the Meiji Group launched our drinking milk value enhancement campaign to increase fans of drinking milk. We work with dairy farmers to develop dairy farms and produce raw milk that our customers find appealing. As part of the campaign, we communicated the struggles and stories behind these efforts.

As of the end of March 2018, we have awarded accreditation to 262 farmers. In FY2018, we plan to expand this support to 724 farmers. Through these activities, we will increase the number of farms producing high-quality milk, and by communicating our commitment and these unique efforts to consumers, we will help increase the value of drinking milk.
Organic Drinking Milk

Meiji Organic Drinking Milk is certified organic under the Japan Agricultural Standards (JAS). This milk comes 100 percent from dairy cows in Hokkaido, conscientiously raised on organic feed. In 1999, we began working with dairy farmers belonging to the Organic Dairy Research Council in the town of Tsubetsu. In 2006, five farms were certified compliant with JAS for organic livestock. The number of certified diary farms increased to eight in 2016. We supply new drinking milk value to our customers who are concerned with the environment and the health of dairy cows.

Stable Supply of Agricultural Chemicals and Veterinary Drugs

Our presence in agrochemicals and veterinary drugs contributes to the stable supply of safe and reliable agricultural, livestock, and marine products, as well as improves productivity around the world.

Approach

ORYZEMATE Protects Rice Plants From Rice Blast

ORYZEMATE prevents plant diseases by raising the disease resistance of rice and vegetables. This chemical helps farmers throughout Japan by contributing to the stable production of rice and vegetables.

Environmentally Friendly Herbicide ZAXA

We develop and sell environmentally friendly agricultural chemicals. ZAXA is a highly-effective long-lasting herbicide suitable for a variety of plants. The main constituent of ZAXA is a type of amino acid commonly found in nature. As a result, this herbicide has minimal effect on soil and is highly safe for livestock. The active ingredients in Meiji Eco Series pesticides and fungicides are also derived from natural sources. The leading product in this series, Harmomate Water-soluble Powders, meets Japan Agricultural Standards for use in organic cultivation.

R&D on New Agricultural Chemicals and Veterinary Drugs That Protect the Environment

Our research and development of agricultural chemicals and veterinary drugs produces groundbreaking products that are eco-friendly and very safe. These products additionally contribute to human prosperity by developing global agriculture and stabilizing food production.

Approach

R&D of Agricultural Chemicals

Afidopyropen / development code ME5343 (insecticide)
Licensing agreement with BASF

Afidopyropen is highly effective against hard-to-control pests like aphids and whiteflies that attack soybeans and vegetables. The product is fast-acting, with sustained effectiveness and highly degradable in the environment. Afidopyropen is expected to be particularly safe for honeybees, important pollinators in the habitat. BASF received the first registrations in Australia and India for this new insecticide in June 2018. BASF submitted the regulatory dossier in the U.S., Canada, and Mexico, with additional registration submissions planned in upcoming years for key markets worldwide. Afidopyropen was discovered by Meiji in collaboration with a research laboratory at the Kitasato Institute, supervised by a 2015 Nobel Prize laureate, Prof. Satoshi Omura. Following a licensing agreement between Meiji and BASF in May 2010, BASF is exclusively developing the product around the world, except for some regions/countries in Asia.

Fenpicoxamide / development code ME5223 (fungicide)

Joint development with DowDuPont

The product is an innovative drug in the fight against wheat leaf blight, which is highly resistant to agricultural chemicals. The effect is long-lasting and the product is highly degradable in the environment. This chemical is scheduled to be registered as an agricultural chemical in Europe, a major market, in 2019.

Flupyrinim / development code ME5382 (insecticide)

Joint development with Arysta LifeScience

Flupyrinim is a new insecticide discovered by Meiji, and is currently under development in Japan (submitted for registration) and overseas. Flupyrinim is effective against the major insect pests in rice, such as planthoppers and stem borers, including those populations resistant to existing insecticides. Furthermore, flupyrinim is a promising technology due to the low toxicity against honeybees, where there are few effective solutions due to growing concerns over the safety to pollinators.

Paddy rice fields in India are the largest in the world (44 million hectares annually), and India accounts for around 21% of global rice production. In India, rice yields may be reduced by up to 45% due to insect pests and diseases. Stem borers and planthoppers notably affect over 30 million hectares of rice. Flupyrinim is an innovative solution that is effective in controlling both stem borers in early cultivation stages and planthoppers in mid-to-late stages with a single application. Meiji and Arysta LifeScience will make further contributions to the development of agriculture in India and make people's lives better by introducing this innovative technology. We will keep up efforts to distribute this technology worldwide, continuing to deliver innovative environmentally friendly products.

Meiji and Arysta Enter into Licensing Agreement Concerning new Insecticide Flupyrinim in India (PDF:48KB)

R&D in Pharmaceutical Segment
Governance
Corporate Governance

Basic Approach

The Meiji Group's philosophy is to brighten customers' daily lives as a corporate group in the Food and Health fields. Our mission is to widen the world of “Tastiness and Enjoyment” and meet all expectations regarding “Health and Reassurance.” We do this with the goal of continuing to find innovative ways to meet our customers’ needs, today and tomorrow. In this way, we aim to achieve sustainable growth and increase corporate value over the medium to long term. The basic approach to management of the Group is for operating companies to manage businesses autonomously while collaborating with each other under the holding company's control.

The main role of Meiji Holdings Co., Ltd., is to advance Groupwide management strategies, create an optimal operating structure, and oversee the business management of operating companies. Responsibility for operational execution is delegated to operating companies appropriately. Within the Group, oversight and execution of business management are separated. Accordingly, the Group has established and operates a corporate governance system including a Board of Directors. Meiji Holdings is a company with audit & supervisory board members. The Board of Directors' oversight and audit & supervisory board members' auditing heighten the objectivity and transparency of business management.

Meiji Holdings operates in line with all the principles of the Corporate Governance Code. We disclosed our actions for all the principles in line with the requirements stated in the code of its revision in June 2018.

Corporate Governance Report (PDF:226KB)

Corporate Governance System
Functions and Roles of Respective Committees

Board of Directors

Members: 3 independent outside directors, 8 internal directors

Structure:

- The composition of the Board of directors as a whole should have the knowledge, experience, and managerial competencies for decision-making. The Board of Directors will consist of directors with knowledge, experience, and abilities in areas vital to core operations and the management of operating companies including corporate development, accounting, finance, human resources, general affairs, and Investor Relations, as well as independent non-employees directors who is capable of providing objective supervision and advice from a wide perspective as a non-executive directors. The appointment of female director will enhance diversity in decision-making.

- The Board of Directors should be consist of managing directors to oversee core operations, executives to manage operating companies, and non-executive directors including two or more independent outside directors. Currently the number of Board of Directors would be around 10.

Role: To develop and pursue Group strategy. To monitor the performance of the management and directors in the operating company. To achieve sustainable growth and increase corporate value over medium- to long-term by realizing our Group philosophy. To improve our profitability and capital efficiency.

Scope of delegation to management teams: Vital matters outlined by law, the Articles of Incorporation, and the Rules of the Board of Directors. Vital matters include overall Group direction and major investment proposals. The execution of businesses and operations outlined by the Board of Directors should be delegated to management teams in accordance with the Group Company Management Regulations and Work Regulations. The Board of Directors will receive periodic reports and review them.

Auditing Structure and Audit & Supervisory Board
Independent auditor

Ernst & Young ShinNihon LLC

Audit department (internal auditing)

Audit Department

Principal meetings auditors attend

Board of Directors, Executive Committee, Audit Department Liaison Meeting, Audit & Supervisory Board, and others

Structure:

• Audit & Supervisory Board: In principle, one regularly scheduled meeting shall be held monthly in accordance with Audit & Supervisory Board Regulations.

• Audits by the Audit & Supervisory Board: The Audit & Supervisory Board will consist of four Board members, of which two must be outside Audit & Supervisory Board members.

• Internal audits: Conducted by dedicated staff from the Audit Department.

• Accounting audits: Designates Ernst & Young ShinNihon LLC.

Efforts to enhance and improve the audit functions of audits by the Audit & Supervisory Board:

• Assign dedicated staff to assist with Audit & Supervisory Boards’ tasks.

• Audit & Supervisory Board members are encouraged to attend important meetings such as Board of Directors’ meetings and Executive Committee meetings.

• Provide periodic reports and distribute important documents to the Audit & Supervisory Board.

Audit & Supervisory Board Members: 2 outside audit & supervisory board members, 2 internal audit & supervisory board members

Nomination Committee

Members: 3 independent outside directors, 2 internal directors
Role: Recommending candidates for the positions of director or executive officer to the Board of Directors
*For reasons for appointment of directors and auditors, refer to the notice of convocation.

Compensation Committee

Members: 3 independent outside directors, 2 internal directors
Basic approach to structure: Compensation Committee should be comprised of independent outside directors and internal directors. At least half of members must be outside directors.
Role: Evaluating the performances and considering the compensation of directors and executive officers
*Refer to “Director Compensation” for details.

Executive Committee (convenes twice a month in principle)

Members: Directors and executive officers
Role: Advisory body to the president and representative director
Function: Deliberating general important matters concerning operational implementation

Business Management System Features

The Company is strengthening its corporate governance structure through the following initiatives.

1. Appointment of two outside directors and two outside audit & supervisory board members, all of whom are designated as independent directors

2. Limitation of the term of service for directors to one year

3. Introduction of an executive officer system to separate business execution and audit functions and to accelerate management decisions while clarifying management responsibility

4. Appointment of one female director

Organizational structure

Company with audit & supervisory board
Chairman of the Board of Directors  President and representative director

Directors  11 (including 3 independent outside directors)

Audit & supervisory board members  4 (including 2 outside audit & supervisory board members)

Appointment of independent directors  5 (Outside directors, outside audit & supervisory board members)

Number of times the Board of Directors convened in fiscal 2017  17

Number of times the Audit & Supervisory Board convened in fiscal 2017  15

Evaluation of Board of Directors
• The Board of Directors will annually analyze and evaluate its own effectiveness/performance.
• The evaluation method is a self-evaluation by Board of Directors’ members (directors and Audit & Supervisory Board members) using a survey sheet.
• The results are analyzed and assessed to improve the functions of the Board of Directors.
• The most recent evaluation analysis results indicate that the Meiji Holdings' Board of Directors is functioning effectively.

Training for Directors, Audit & Supervisory Board Members, and Executive Officers
Meiji Holdings provides directors, Audit & Supervisory Board members, and executive officers with opportunities as necessary to further their understanding of their expected roles and duties, and opportunities to acquire required knowledge.

(Required knowledge)
Group operations, organizations, financial status, etc.

Criteria for Independence
Meiji Holdings requires that independent outside directors and outside Audit & Supervisory Board members not being applicable to any of the following:
(1) An executive director of Meiji Holdings or its subsidiary.
(2) An executive director of the Meiji Holdings parent company or a fellow subsidiary of the Meiji Holdings parent company.
(3) A party(Notes) for whom Meiji Holdings is a major transaction partner or an executive director of said party, or a major transaction partner(Notes) for Meiji Holdings or an executive director of said party.
(4) A consultant, accounting specialist, or legal specialist earning major monetary amounts or other assets from Meiji Holdings other than director’s compensation(Notes) (if the party earning said assets is a corporation, union, or other organization, this shall refer to persons associated with said organization).
(5) A party who was applicable to (1) during the 10-year period prior to selection.
(6) A party who was applicable to (2) through (4) during the 1-year period prior to selection.
(7) A relative within second degree of kinship to a party (excluding non-executives) who is currently applicable to (1) through (4) or who was applicable during the 1-year period prior to selection.

(Notes)
1. A “party for whom Meiji Holdings is a major transaction partner” shall refer to a party who received payments from Meiji Holdings equal to or exceeding 2% of said party’s total annual consolidated net sales or 100 million yen, whichever is higher, during the most recent fiscal year.
2. A “major transaction partner for Meiji Holdings” shall refer to a party who made payments to Meiji Holdings that were equal to or exceeded 2% of our total annual consolidated net sales during the most recent fiscal year.

3. “A consultant, accounting specialist, or legal specialist earning major monetary amounts or other assets from Meiji Holdings other than director compensation” shall refer to a party who received monetary payments or assets other than director’s compensation from Meiji Holdings of a value equal to or exceeding 2% of said party’s consolidated net sales of 10 million yen, whichever is higher, during the most recent fiscal year.

Multiple Positions as Independent Outside Director

When an independent outside director will hold the position of director at multiple listed companies, the number of positions must not exceed the amount appropriate for ensuring the ability to secure the time and labor required to execute the roles and responsibilities as a director or Audit & Supervisory Board member of Meiji Holdings.

Transactions between Related Parties

• When a director or Audit & Supervisory Board member of Meiji Holdings or a major operating company seeks to conduct a transaction with Meiji Holdings or a major operating company, said transaction shall require the approval of the Board of Directors.

• The transaction status of approved transactions must be reported to the Meiji Holdings Board of Directors.

Note 1. As per the resolution of the 1st Ordinary General Meeting of Shareholders held on June 29, 2010, the amount of remuneration for directors is capped at 1 billion yen per year (not including the employee portion of remuneration for directors who concurrently serve as employees).

Note 2. As per the resolution of the 1st Ordinary General Meeting of Shareholders held on June 29, 2010, the amount of remuneration for Audit & Supervisory Board members is capped at 300 million yen per year.

Note 3. We have introduced a transfer-restricted stock compensation plan for directors other than outside directors. As per the resolution of the 8th Ordinary General Meeting of Shareholders held on June 29, 2017, the amount of remuneration under this plan is capped at JPY 200 million per year.

Note 4. The amounts for monetary/stock remuneration indicates the amount appropriated (recorded in expenses).
Nomination policy

Director Candidates
(Policy)
• Internal director candidates: Requires vast experience and expert knowledge as well as management judgment skills and an excellent character. Elect executive directors for major operations and executives of operating companies.
• Independent outside director candidates: Requires an objective and multifaceted perspective on management, and satisfies our criteria for judging independence. Elect persons with the character, knowledge, and skills required to fulfill the role of an outside director.

(Method)
Nominated annually via a resolution by the Board of Directors following deliberation by the Nomination Committee.

(Compensation Structure)
Compensation for directors other than outside directors comprises the following:
1) Base compensation
   A fixed amount that reflects the director’s status and responsibilities
2) Performance-linked compensation
   An amount that varies according to the company and the director's performance in the preceding fiscal year, and thus provides an incentive over the short term.
3) Stock-based compensation
   Compensation that is linked with the Company's stock performance, and thus provides an incentive over the medium-to-long term.

Base compensation and performance-linked compensation are paid in cash. Stock-based compensation takes the form of transfer-restricted stocks.
The ratio between the fixed component (base compensation) and variable component (performance-linked compensation + stock-based compensation) of the total remuneration is approximately 60:40.
For outside directors, who are not involved in the execution of business, the Company pays fixed compensation only; no incentive remuneration is paid.
To ensure objectivity and transparency in the process for determining the above remuneration system and the levels of remuneration, the Board of Directors determines the amounts separately based on the recommendations of the Compensation Committee, which is composed of four members: three outside directors and one internal director.
The amount of compensation for Audit & Supervisory Board members is determined through negotiation with the members concerned, and the amount will be within the limit resolved by the General Meeting of Shareholders.

Audit & Supervisor Board candidates
(Policy)
• Elect persons with excellent character, knowledge, expert skills and a strong sense of ethics. Candidates must be able to provide accurate advice and conduct audits concerning the legality and appropriateness of company operations from an objective and neutral perspective.
• Include at least one person with appropriate knowledge related to finance and accounting.

(Method)
Nominated via a resolution by the Board of Directors following deliberation by the Nomination Committee and approval by the Audit & Supervisory Board.

Executive Officer Candidates
(Policy)
Evaluate performance and experience to elect parties capable of conducting transparent, fair, timely, and decisive decision-making and conducting optimal Group management.

(Method)
Nominated annually via a resolution by the Board of Directors following deliberation by the Nomination Committee.
Succession plan for the CEO and other top executives
The Nomination Committee recommends on appointments and dismissals of top executives. This committee comprises at least four members, and the majority are independent outside directors. The members have a say in the succession plan for the CEO and other top executives.

We have celebrated 100th anniversary in 2016 and created the Meiji Group 2026 Vision, our Long-term Business Plan. With a view to achieving the group's vision for 2026, we have established a set of standards ("Leadership Value") for our executives. Leadership Value was reviewed by both the Nomination Committee and the Board of Directors before being resolved by the latter in January 2018.

We regard Leadership Value as an important step forward in our CEO / top executive succession planning efforts. Leadership Value describes the standards that our executives must uphold to lead the group toward achieving its vision. The main thing we expect of top executives is the ability to "instigate change and lead reform efforts." To this end, Leadership Value outlines the following 10 competences across three themes:

1) Strategic planning and action: Imagination, decisiveness, ability to achieve breakthroughs, ability to channel creative energies
2) Organizational leadership skills: Ability to communicate and convince, ability to motivate, magnanimity for others' mistakes, ability to develop others' talents
3) Character: Ability to recognize and channel diverse talents, upstanding character

Based on our Leadership Value, we will promote the development of succession planning.

Interlocking Ownership of Listed Stocks

When exercising voting rights for retained listed stocks, Meiji Holdings makes affirmative decisions based on deference to the decisions of the board of directors of the company in question. However, this excludes cases where said vote could have a negative impact on the relationships or transactions of the Meiji Group, or cases where there is the clear potential for a mutual loss of profit by shareholders.

Internal Control System

We provide products and services to a large number of customers through our food and pharmaceuticals business operations. In accordance with the Corporate Behavior Charter, the Meiji Group has established an internal control system befitting the Group and the Group companies that is based on mutual collaboration and multifaceted checking functions to ensure directors, executive officers, and other employees comply with the Food Sanitation Act, the Pharmaceutical and Medical Device Act, and other statutory laws and regulations and the Articles of Incorporation, thereby ensuring fair and sound business activities firmly rooted in compliance.

Compliance

Regarding "compliance as the cornerstone of its operations," the Meiji Group abides by statutory laws and regulations, international agreements, social norms, and the regulations of respective Group companies. The Group advances concerted initiatives aimed at inculcating and entrusting compliance awareness to ensure that employees carry out their duties equitably and honestly and based on a well-developed awareness of compliance and high ethical standards. Such efforts include improving and expanding educational and training programs, disseminating information through an in-house intranet, and making hotlines available.

Risk Management System

The Company has established specific rules for risk management and constructed an appropriate risk management system. For the whole Group, the Company systemically conducts precise risk
management. In addition, it has established systems to minimize damage in the event of an emergency.

In light of lessons learned from the Great East Japan Earthquake in March 2011, the Group has established basic policies for business continuity plans as stated below.

**Basic Policies for Business Continuity Plans**

To ensure it can provide customers with the products and services they require, even in disaster, the Meiji Group has set out business continuity plans based on the following policies.

1. Ensure the safety of the lives of persons involved in the Group and their families
2. Discharge the Group's social responsibility
3. Minimize damage to businesses arising from cessation of operations

**Communicating with Shareholders**

Meiji Holdings works proactively and voluntarily towards communicating with shareholders, and promotes constructive communication with shareholders. Related initiatives are detailed below.

1. General communication with shareholders is managed by the PR & IR Department, which is managed by the director in charge of Public Relations & Investor Relations.
2. To enhance communication, related departments (Investor Relations, Corporate Development, Financial & Accounting, General Affairs) share information at liaison meetings.
3. In addition to one-on-one meetings, Meiji Holdings holds earnings conferences twice-yearly for institutional investors and securities analysts to announce the second quarter and the fiscal year results, as well as small meetings led by the Company President. We also provide information via our website for shareholders and investors. We publish our investment securities reports, earnings flash reports (Japanese/English), annual reports (English only), and earnings conference materials (Japanese/English) on this website. We also stream video of our earnings conferences and publish a Q&A summary to further communication.
4. Comments and feedback gained through investor relations activities are summarized into reports. The director in charge of Public Relations & Investor Relations reports to the Executive Committee and the Board of Directors regularly.
5. Due care is given to insider information during communication. Communication is conducted in accordance with the Rules Concerning the Prevention of Insider Trading, which outlines the handling of important information. We also establish a quiet period.
Compliance

In accordance with our Corporate Behavior Charter, we promote fair, transparent, and free competition. We conduct all transactions in compliance with the laws and regulations of the country in which business is done. We respect local cultures and customs and conform to our own in-company regulations. To further strengthen compliance, we work to improve training and increase compliance awareness throughout our organization.

Management System

Risk management and Compliance are closely interrelated. Accordingly, we have established a Compliance & Risk Management Committee within our Food segment. This committee, chaired by an officer appointed by the president, prepares and advances risk management action plans for our operating bases. For example, we conduct a compliance questionnaire annually, analyzing the results and identifying actions to take. Also, we conduct in-house activities to raise compliance awareness, including in-house training and a Compliance Improvement Month.

We have established a Compliance & Risk Management Committee, chaired by the president, in our Pharmaceutical segment. The Pharmaceutical segment has Compliance Program Guidelines set in place which provides rules for fair business practices, including prohibiting bribes to government officials and other inappropriate acts.

Contact Information for the Compliance Counseling Desk

The Meiji Group provides contact information for our compliance counseling desk to respond to whistling-blowing and provide consultation via various methods (including telephone, postal mail, e-mail, etc.). The Meiji Group outlines privacy protection in internal regulations to ensure that whistleblowers and people seeking consultation are not subjected to any unfair treatment.

Increase Compliance Awareness

Employees carry our Compliance Card, which includes the Corporate Behavior Charter and the contact details for our compliance counseling desk. The Meiji Group ensures strict adherence to the Corporate Behavior Charter. At the same time, the group cultivates and entrenches compliance awareness by enhancing in-house education and training and disseminating information through our intranet.

An Ethical and Transparent Pharmaceuticals Company

Pharmaceuticals segment has established a Code of Practice for all officers and employees. As a pharmaceuticals company, Meiji Seika Pharma is committed to meeting society’s expectations through the highest standards of ethics and transparency. The company promotes accountability through ongoing dialogue with associated researchers, healthcare practitioners, and patient groups. Pharmaceuticals segment has also established Guidelines on Transparency of Relationships between Corporate Activities and Medical Institutions. Based on these guidelines, the company
discloses details of the academic research grants it provides. These disclosures help illustrate the ways in which we contributes to progress in the life sciences, while adhering to the highest ethical standards.
Risk Management

Minimizing risk is important. As a corporate group operating in the food and health fields, it is our responsibility to ensure stable supply of pharmaceuticals, infant formulas, and enteral formulas, even in times of emergency.

Risk Management System

Meiji Group has risk management systems in place for our Food and Pharmaceutical segments. We conduct regular information sharing, identifying problems, and outlining resolutions.

Approach

Business Continuity Plans

We are in the process of further strengthening our business continuity plans. In the event of a major earthquake or other large-scale disaster, we aim to be able to restore operations as quickly as possible to continue supplying important foodstuffs and pharmaceuticals. We carry out ongoing disaster awareness measures, and conduct regular drills for our employee safety confirmation systems. We are also implementing improvements throughout the value chain. These improvements include establishing robust operational and infrastructural systems, earthquake-proofing facilities, increasing the number of production sites, decentralizing supply sources, and establishing IT system backups.

Basic Policies for Business Continuity Plans

To ensure are provided with the products and services they need, even in times of disaster, the Meiji Group will establish business continuity plans for three main purposes:
1. Ensure the lives and safety of persons and families involved in the group
2. Ensure the group continues to meet its social responsibilities
3. Minimize damage to our businesses that could arise from interrupted operations

Information Security

We have established a variety of information security policies and rules which aim to protect our intellectual property and strengthen the management of personal, confidential, and other sensitive information. We train employees thoroughly in information security, and we strive to remain abreast of advances in IT technology.

We are committed to providing stakeholders with all necessary information. Help desks and websites are available for customers at each of our businesses, and information is disclosed to shareholders and investors through investor relation activities and specialized websites.

Reducing Risk Associated with Social Networking Services

The Meiji Group has established various rules to reduce risk associated with social networking services. Moreover, we draw employee attention to such risks via an in-house portal site.

Privacy Protection

We appreciate the importance of customer privacy. We comply with relevant laws and standards for the protection of personal information, and we have established a Group Personal Information Protection Policy.
Intellectual Property

Intellectual property has grown increasingly important in recent years due to growing awareness of intellectual property issues in society and a variety of new government measures. We acquire intellectual property rights for the new products and technologies we research and develop. These rights make it possible for us to continue supplying customers with high added-value products.
CSR Management

The basis of “the Meiji Group’s Approach to CSR” is to fulfill corporate social responsibility (CSR) by putting the Group Philosophy into practice on a day-to-day basis in mainstay businesses and by remaining a corporate group society needs. Each Meiji Group employee will advance activities based on the Corporate Behavior Charter to meet stakeholders’ expectations and continue fulfilling social responsibilities.

Meiji Group 2026 Vision

Our promise and commitment for the 2026 Vision
We will combine the strengths, the Meiji Group has cultivated over the past 100 years, with the latest technology and new findings. Thus we create innovative ways to meet our customers’ needs with food and health and grow in Japan and around the world sustainably.

Approach

Key Strategies

1. Secure an overwhelming advantage in core businesses
2. Establish growth foundation in overseas markets
3. New challenges in the health value domain
4. Social contributions

Meiji Group CSR 2026 Vision

As Food and Health professionals, we contribute to addressing social issues through our business activities, and to realizing a sustainable society for people to live healthy, peaceful lives.

The Meiji Group has created the Meiji Group CSR 2026 Vision. This was designed to embody “Social contributions”, which is a key strategy in the Meiji Group 2026 Vision. The CSR vision identifies activities that the Meiji Group should embrace over the long term. We have set KPIs so that the Group CSR Committee can monitor our progress and disclose information.

Creating our Vision

**STEP 1** Identify issues and select activities
Select activities tailored for the Meiji Group considering business initiatives, community requests and sustainable development goals (SDGs).

**STEP 2** Identify materiality and set the KPIs
Set the KPIs. Confer with experts outside of the company regarding the selected activities, identify materiality (material issues).

STEP 3 Obtain approval from management

CSR secretariat and the Group CSR Committee discusses, and the Board of Directors makes a decision.

Outline of Vision

The Meiji Group CSR 2026 Vision is broken down into three themes: “Healthier Lives”, “Caring for the Earth” and “A Richer Society”. We established specific areas of activities under each theme. Based on this framework, shown in the figure, we promote CSR activities that are developed in the Meiji way to fulfill our corporate responsibilities.

Materiality and KPIs

We identified the materiality and set the KPIs as indicated below in the CSR 2026 Vision. By achieving these performance indicators, we will help solve issues in society and also improve our corporate value.
Feedback from Experts

The CSR 2026 Vision is based on two solid foundations focusing on three important themes. Its approach is easy-to-understand and its content is attractive. A "Low-carbon society" is the one area that should be revised quickly. With the international community heading toward "de-carbonization", I believe that a long-term vision is needed to cover changing the power at least used in manufacturing and operation to 100% renewable energy.
In the age of SDGs, I think that it is well-timed that the Group set up the new CSR 2026 Vision focusing on addressing social issues. I expect that the Group will continue to disclose information as the Group achieves success through its business.

Mr. Hidemi Tomita
Director, Lloyd's Register Japan K.K.

Sustainability Video (Meiji Group 2026 Vision)

Group CSR System

Approach

The Meiji Group CSR Committee comprises senior officers from Meiji Holdings Co., Ltd., Meiji Co., Ltd., Meiji Seika Pharma Co., Ltd., and KM Biologics Co., Ltd. It also includes CSR affiliates from each company. The committee is chaired by the president of Meiji Holdings, and vice-chaired by the presidents of Meiji, Meiji Seika Pharma and KM Biologics. The committee promotes CSR management for the entire Group. The committee is tasked with preparing the Group’s basic CSR policies, monitoring the progress of activities at individual companies, and providing guidance and support in regards to relevant issues. The committee meets three times a year. The committee’s discussions are based on the Meiji Group’s System of Principles and Stakeholder Policy, and reflect ISO 26000 international standards for corporate social responsibility. A CSR Secretariat has also been established underneath the Group CSR Committee. The secretariat holds monthly meetings that aim to improve CSR through the sharing of information. The secretariat consists of CSR staffs from each department at Meiji Holdings as well as from the three major operating companies. The Meiji Group CSR Committee’s discussions are based on Sustainable Development Goals, which include issues such as climate change and sustainable procurement. The CSR secretariat holds monthly meetings that aim to improve CSR through the sharing of information. The CSR secretariat informs the board of directors about the group CSR activities twice a year.
CSR Promotion

Approach

Holding Workshops with Experts

The Group CSR Committee hold workshops with outside professionals. We invited Mr. Hiroshi Tomita, the manager of Cre-en Inc., to a workshop in July 2017. Mr. Tomita gave a seminar about applying Sustainable Development Goals towards business.

We invited Mr. Tsuneo Oba, executive director of Global Compact Network Japan, and Mr. Hiroshi Tomita to a workshop in July 2018. Mr. Tsuneo Oba gave a seminar about Global Compact.

Informing Employees

The Meiji Group strives to keep employees informed about our CSR system and activities. Each edition of our internal company magazines includes important CSR information for domestic and overseas employees, such as recent CSR activity news, special features on relevant topics, and policies. We have published internal company magazine "Meiji Journal" in English and Chinese biannually.

Editorial Policy

Starting from August 2018, Meiji Group issues the Integrated Report and replace the Annual Report that has been issued up until now. This Sustainability website complements the Integrated Report, introducing various activities contributing to the sustainability of the world.

Scope and Boundary of Reporting

Organizational Scope

This report covers the activities of the Meiji Group, comprising, unless otherwise noted, Meiji Holdings Co., Ltd., Meiji Co., Ltd., Meiji Seika Pharma Co., Ltd., and KM Biologics Co., Ltd., and these Group companies.

Period Covered

Fiscal Year End March 2018 (April 1, 2017-March 31, 2018)
Some qualitative information includes performance of FYE March 2019.

The Meiji Group has established the following policies pursuant to the Meiji Group Corporate Behavior Charter.

**Meiji Group Policy on Human Rights**

At the Meiji Group, we recognize that all people are born free and with equal dignity and rights. We act fairly and faithfully to uphold this Policy on Human Rights in all of our business activities.

**Respect for Human Rights and Prohibition of Discrimination**

1. As a member of the international community, the Meiji Group respects fundamental human rights and seeks to avoid any complicity in the violation of human rights under any circumstances. We comply with the laws and regulations of each country and region, respect local cultures, and have zero tolerance for discrimination based on ethnicity, gender, age, language, religion, nationality, disability, social origin, property, or any other personal status.

**Prohibition of Forced and Child Labor**

2. We do not utilize forced or child labor under any circumstances.

**Prohibition of Harassment**

3. We have zero tolerance for sexual, psychological or verbal harassment, or any other kind of conduct that constitutes a violation of human rights.

**Safe and Healthy Workplaces**

4. We strive to maintain a safe, comfortable working environment to help ensure the physical and mental health of all of our employees.

**Respect for Fundamental Rights of Employees**

5. We respect the fundamental rights of all of our employees. We maintain dialogue with employees in an effort to build sound relationships with them and resolve any issues that arise.

**Meiji Group Policy on Occupational Health and Safety**

The Meiji Group's first priority is safety. With this in mind, we ensure workplace safety. We are committed to helping maintain and improve employees' health.

**Legal and Regulatory Compliance**

1. We comply with all laws and corporate rules related to occupational health and safety in the workplace.
Prevention of Work-Related Accidents
2. We identify and assess sources of danger in the workplace and reduce or eliminate risks to prevent work-related accidents.

Physical and Mental Health Maintenance
3. We provide safe, comfortable workplace environments and support employees’ sound physical and mental health.

Health and Safety Education for Employees
4. We regularly offer in-house training on occupational health and safety as well as traffic accident prevention. We encourage employees to be aware of the importance of occupational health and safety.

Meiji Group Procurement Policy

At the Meiji Group, we seek to provide our customers with high-quality, safe, and secure products. We are committed to fair and transparent transactions and maintain compliance with all laws and regulations, working in cooperation with our partners to ensure that all procurement activities fulfill our social responsibilities, including those related to human rights and the environment.

Legal and Ethical Compliance
1. We comply with the laws and regulations of the countries in which we operate and engage in fair, transparent, and proper procurement activities. We fulfill the terms of our contracts with partners in good faith and appropriately manage all confidential and personal information related to procurement transactions.

Product Quality and Safety
2. In our procurement activities, we place the highest priority on quality and safety in order to bring peace of mind to everyone who selects our products.

Fair and Transparent Selection of Suppliers
3. We are committed to selecting suppliers in a fair and transparent manner. We evaluate potential suppliers based on product quality and safety, as well as price, delivery time, and their track record in providing stable supplies.

Protection of Human Rights and the Environment
4. In line with the Meiji Group Policy on Human Rights and the Meiji Group Environmental Policy, we integrate human rights and global environmental considerations in developing and executing procurement activities.

Mutual Trust and Collaboration with Suppliers
5. We work to build cooperative, trusting relationships with suppliers, thereby striving to reduce procurement-related risks, and we pursue initiatives to be of benefit to the broader society.

- Cocoa Procurement Guideline
- Palm Oil Procurement Guideline
- Paper Procurement Guideline

Meiji Group Environmental Policy

Environmental Philosophy
Recognizing that our business operations originate from the bounty of nature, we, the Meiji Group, will contribute to the creation of a sustainable society. To this end, we intend to harmonize our business activities with the global environment and manage us in a way that protects the environment.

Environmental Policy
Compliance with Laws and Regulations
1. We comply strictly with environment-related laws, regulations and ordinances, stakeholder agreements, industry norms, and our voluntary standards.

Continuous Improvement of Environmental Conservation Activities
2. We improve our environmental conservation activities continually throughout our entire supply chain.

Reduction of Environmental Impact
3. We pursue energy conservation toward a decarbonization, striving to reduce emissions of CO2 and other greenhouse gases.
4. We use water effectively and manage water quality appropriately, treating this valuable and limited resource with respect.
5. We reduce waste, reuse resources, and encourage recycling throughout our product lifecycle in general and in all business activities, contributing to achieve a circular society.

Biodiversity Conservation
6. We pursue biodiversity conservation by protecting ecosystems based on a global perspective in all our business activities.

Appropriate Information Disclosures
7. We engage with our stakeholders, providing timely and appropriate disclosures of environmental information.

Revised September 1, 2018

Meiji Group Tax Policy
At the Meiji Group, we comply with the tax laws and provisions of each country and region in which we operate. At the same time, we accomplish our social responsibility as a corporate citizen to pay taxes properly, contributing to economic and social development.

Tax Compliance
1. We comply with the tax laws, international agreements, social norms, and internal rules determined by each group company, etc., acting fairly and faithfully in accordance with high ethical standards.

Minimize Tax-Related Risks
2. To minimize tax-related risks, we strive to understand the tax laws and administrative systems in every country and region in which we operate, responding as appropriate.

Reduce Uncertainties
3. At times, group companies enter into business transactions for which the tax interpretation is not clear. In these cases, we investigate carefully any tax-related risks, seeking the advice of experts when necessary. In this way, we reduce uncertainties related to taxes.

International Mechanisms
4. We strive to comprehend the objectives behind OECD transfer pricing guidelines, mechanisms based on Base Erosion and Profit Shifting (BEPS), and various policies related to tax havens, responding to the tax systems and requirements the countries and regions in which we operate. In this way, we aim to ensure the transparency of our international business transactions.

Transfer Pricing
5. To ensure the appropriate allocation of profits among the countries and regions in which we operate, we conduct transactions appropriately with related overseas entities in consideration of arm’s-length pricing.

Relationships With Tax Authorities
6. We cooperate with tax audits and tax administration in the countries and regions in which we operate, striving to maintain positive relationships with tax authorities.
Meiji Group Anti-Corruption Policy

At the Meiji Group, we engage in anti-corruption initiatives to remain a transparent, wholesome corporate group trusted by society, as defined in our Management Attitude.

Compliance With Laws and Regulations, etc.
1. We comply with the laws and regulations of each country and region in which we operate, as well as with group internal rules, to prevent corrupt practices. We also note the extraterritorial application of laws and regulations in countries and regions outside of Japan.

Prohibition Against Bribery, etc.
2. We prohibit, whether through direct or indirect means, the granting, proposing, or promising of bribes to government officials or equivalent persons, holding improper relationships with business partners or others, or engaging in relationships with antisocial forces.
3. We prohibit the offering or receiving of inappropriate money, gifts, entertainment, or other property benefits exceeding a scope deemed proper according to social convention.

Cooperation With Audits and Investigations
4. We provide full cooperation and appropriate responses to financial-related audits, etc. conducted by external financial statement auditors and group internal audit departments, as well as investigations conducted by relevant government authorities, etc.

Improvement of System
5. To prevent or detect corrupt practices as quickly as possible, we strive to improve a system for officers and employees to seek consultation or to submit notice of acts in violation of this policy or acts which may be in violation of this policy. We do not punish person seeking consultation or submitting notice in connection with its action.

Education and Training for Anti-Corruption
6. We provide appropriate education and training related to this policy and anti-bribery rules, etc. to officers, employees and business partners or others, striving to prevent corrupt practices.

Disciplinary Action, etc.
7. We take strict disciplinary action against officers or employees who violate this policy, in accordance with employment rules and other group internal rules. We also take appropriate measures against business partners or others who violate this policy.

Pledge of Health and Productivity Management

The Company published its Pledge of Health and Productivity Management in April 2018. The Company aims to create a comfortable workplace for employees to be healthy and active, both physically and mentally. This pledge applies to domestic Meiji Group companies and their officers and employees.

Pledge of Health and Productivity Management

Mental and physical health are fundamental to our employees and their families in enriching employee lives and allowing them work to their full potential. Mental and physical health are also fundamental to the company to increase productivity and corporate value.

We at the Meiji Group aim to be a comfortable place to work, fostering dynamic employees who are healthy in mind and body.

1. Employees mindfully manage their own health and the health of their families.
2. The company actively supports employees as they work to build their health management skills.
3. The company endeavors to establish a workplace where employees can work in confidence, both physically and mentally.
Cocoa Procurement Guideline

The Meiji Group procures cocoa according to the Meiji Procurement Policy, working with suppliers to engage in socially responsible activities (human rights, environment, etc.).

Scope of Application

Cocoa used in the production of consumer-use and industrial-use products.

Principles for Action

1. We comply with the laws and regulations of cocoa-producing countries and regions, engaging in cocoa procurement via appropriate procedures.

2. We engage in sustainable cocoa procurement in accordance with the Meiji Group producer support program (Meiji Cocoa Support) and in cooperation with the World Cocoa Foundation.
   a. Ensuring labor conditions are appropriate and respect human rights (monitoring for child labor, forced labor, etc.)
   b. Ensuring the preservation of environmentally important areas (ecosystems, natural forests) in cocoa-producing regions

3. We notify suppliers that they are required to comply with the Cocoa Procurement Guideline. We take action as deemed necessary if we suspect suppliers of non-compliance.

4. We publish an annual report on our cocoa procurement activities.
Palm Oil Procurement Guideline

The Meiji Group procures palm oil according to the Meiji Procurement Policy, working with suppliers to engage in socially responsible activities.

Scope of Application

Palm oil used in the production of consumer-use and industrial-use products.

Principles for Action

1. We give priority to the use of certified palm oil (RSPO, ISPO, MSPO, etc.).

2. When using non-certified palm oil, Meiji (alone or in conjunction with third parties) selects palm oil recognized as being produced in a sustainable manner, according to a. through d., below:
   a. Produced in compliance with laws and regulations of the country of production.
   b. Produced under labor conditions that are appropriate and respect human rights (monitoring for child labor, forced labor, etc.)
   c. Produced under conditions respecting the land rights of indigenous peoples and others.
   d. Produced under conditions that preserve environmentally important areas (ecosystems, natural forests) in palm oil-producing regions.

3. We notify suppliers that they are required to comply with the Palm Oil Procurement Guideline. We take action as deemed necessary if we suspect suppliers of non-compliance.

4. We publish an annual report about palm oil usage and certified palm oil substitutes.
Paper Procurement Guideline

The Meiji Group procures paper according to the Meiji Procurement Policy, working with suppliers to engage in socially responsible activities.

Scope of Application

- Paper used in Meiji Group products and packaging
- Office paper, including photocopier paper, printed matter and product brochures

Principles for Action

1. We give priority to the use of environmentally friendly FSC*1, PEFC*2, and other forest certified and/or recycled paper.

2. When using non-certified/non-recycled paper, Meiji (alone or in conjunction with third parties) selects paper in compliance with a. through d. below:
   a. All wood used is produced in compliance with laws and regulations of the country of production.
   b. Laborers involved in cutting and harvesting labor under conditions that are appropriate and respect human rights.
   c. Cutting and harvesting activities respect the land rights of indigenous peoples and others.
   d. Produced under conditions that preserve environmentally important areas (ecosystems, peatlands, and natural forests) in production regions.

3. We notify suppliers that they are required to comply with the Paper Procurement Guideline. We take action as deemed necessary if we suspect suppliers of non-compliance.

4. We publish an annual report of our environmentally friendly paper usage and related initiatives.

Collaborating With UN Agencies and Other Relevant Organizations

We collaborate with UN agencies and other relevant organizations.

**Collaborating With UN Agencies and Other Relevant Organizations**

- **Stop TB Partnership**
  We supply kanamycin to tuberculous patients through the Stop TB Partnership
  - Ensure the sustainable supply of pharmaceuticals

- **UNICEF**
  Medreich contributes to medicine accessibility through UNICEF
  - Ensure the sustainable supply of pharmaceuticals

- **The Nutrition Japan Public Private Platform (NJPPP)**
  We contribute to nutrition improvement in emerging countries in partnership with NJPPP
  - Improve nutrition in emerging countries

- **UNHCR (UN Refugee Agency)**
  We donate resources to a child refugee nutrition program through the offices of the UNHCR (UN Refugee Agency)
  - Promote social contribution, Donation

### Biodiversity

**Policy of biodiversity conservation**
We state at section 4 of Meiji environmental policy.

**Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas**
We jointly established a bird sanctuary in the Nemuro Nature Conservation Area, which we own, in Nemuro-shi, Hokkaido. In the conservation area, our employees volunteer to protect the environment.

| 102-56            | External assurance        | a. A description of the organization’s policy and current practice with regard to seeking external assurance for the report.  
b. If the report has been externally assured:  
i. A reference to the external assurance report, statements, or opinions. If not included in the assurance report accompanying the sustainability report, a description of what has and what has not been assured and on what basis, including the assurance standards used, the level of assurance obtained, and any limitations of the assurance process;  
ii. The relationship between the organization and the assurance provider;  
iii. Whether and how the highest governance body or senior executives are involved in seeking external assurance for the organization’s sustainability report. |
|                   |                           | ESG Data > Society > Accreditation in animal testing  
| 103: Management Approach |                           | 103-1 a. An explanation of why the topic is material.                                                                                     |                                                                                   |
b. The Boundary for the material topic, which includes a description of:
   i. where the impacts occur;
   ii. the organization's involvement with the impacts. For example, whether the organization has caused or contributed to the impacts, or is directly linked to the impacts through its business relationships.
   c. Any specific limitation regarding the topic Boundary.

---

### 103-2 The management approach and its components

a. An explanation of how the organization manages the topic.
b. A statement of the purpose of the management approach.
c. A description of the following, if the management approach includes that component:
   i. Policies
   ii. Commitments
   iii. Goals and targets
   iv. Responsibilities
   v. Resources
   vi. Grievance mechanisms
   vii. Specific actions, such as processes, projects, programs and initiatives
Evaluation of the management approach

a. An explanation of how the organization evaluates the management approach, including:
   i. the mechanisms for evaluating the effectiveness of the management approach;
   ii. the results of the evaluation of the management approach;
   iii. any related adjustments to the management approach.

Climate change > Environmental Management > Third-Party Certification

Topic Specific Standards

Economic

201: Economic Performance

a. Direct economic value generated and distributed (EVG&D) on an accruals basis, including the basic components for the organization’s global operations as listed below. If data are presented on a cash basis, report the justification for this decision in addition to reporting the following basic components:
   i. Direct economic value generated: revenues;
   ii. Economic value distributed: operating costs, employee wages and benefits, payments to providers of capital, payments to government by country, and community investments;
   iii. Economic value retained: ‘direct economic value generated’ less ‘economic value distributed’.

b. Where significant, report EVG&D separately at country, regional, or market levels, and the criteria used for defining significance.

Consolidated Financial Results p9-12: Quarterly Consolidated Financial Statements (PDF:603KB)

201-2 Financial implications and other risks and opportunities posed by climate change that have the potential to generate

Business Risks
opportunities due to climate change

substantive changes in operations, revenue, or expenditure, including:
i. a description of the risk or opportunity and its classification as either physical, regulatory, or other;
ii. a description of the impact associated with the risk or opportunity;
iii. the financial implications of the risk or opportunity before action is taken;
iv. the methods used to manage the risk or opportunity;
v. the costs of actions taken to manage the risk or opportunity.

a. if the plan's liabilities are met by the organization's general resources, the estimated value of those liabilities.
b. If a separate fund exists to pay the plan's pension liabilities:
i. the extent to which the scheme's liabilities are estimated to be covered by the assets that have been set aside to meet them;
ii. the basis on which that estimate has been arrived at;
iii. when that estimate was made.
c. If a fund set up to pay the plan's pension liabilities is not fully covered, explain the strategy, if any, adopted by the employer to work towards full coverage, and the timescale, if any, by which the employer hopes to achieve full coverage.
d. Percentage of salary contributed by employee or employer.
e. Level of participation in retirement plans, such as participation in mandatory or voluntary schemes, regional, or country-based schemes, or those with financial impact.

201-3 Defined benefit plan obligations and other retirement plans

201-4 Financial assistance received from government

a. Total monetary value of financial assistance received by the organization from any government during the
reporting period, including:

i. tax relief and tax credits;
ii. subsidies;
iii. investment grants, research and development grants, and other relevant types of grant;
iv. awards;
v. royalty holidays;
vi. financial assistance from Export Credit Agencies (ECAs);
vii. financial incentives;
viii. other financial benefits received or receivable from any government for any operation.

b. The information in 201-4-a by country.
c. Whether, and the extent to which, any government is present in the shareholding structure.

202: Market Presence

a. When a significant proportion of employees are compensated based on wages subject to minimum wage rules, report the relevant ratio of the entry level wage by gender at significant locations of operation to the minimum wage.

b. When a significant proportion of other workers (excluding employees) performing the organization’s activities are compensated based on wages subject to minimum wage rules, describe the actions taken to determine whether these workers are paid above the minimum wage.

c. Whether a local minimum wage is absent or variable at significant locations of operation, by gender. In circumstances in which different minimums can be used as a reference, report which minimum wage is being used.

d. The definition used for ‘significant locations of operation’.

<p>| 202-1 | Ratios of standard entry level wage by gender compared to local minimum wage | Not Disclosed |</p>

c. Total number of confirmed incidents when contracts with business partners were terminated or not renewed due to violations related to corruption.
d. Public legal cases regarding corruption brought against the organization or its employees during the reporting period and the outcomes of such cases.

206: Anti-competitive Behavior

Legal actions for anti-competitive behavior, anti-trust, and monopoly practices

| 206-1 | a. Number of legal actions pending or completed during the reporting period regarding anti-competitive behavior and violations of anti-trust and monopoly legislation in which the organization has been identified as a participant.
|       | b. Main outcomes of completed legal actions, including any decisions or judgments. |
|       | Not Disclosed |

Environmental

301: Materials

Materials used by weight or volume

| 301-1 | a. Total weight or volume of materials that are used to produce and package the organization’s primary products and services during the reporting period by:
|       | i. non-renewable materials used;
|       | ii. renewable materials used. |
|       | Climate change > Environmental Management > Material Balance
|       | ESG Data > Environment > Circular Economy > Raw materials |

Recycled input materials used

| 301-2 | a. Percentage of recycled input materials used to manufacture the organization’s primary products and services. |
|       | Not Disclosed |

Reclaimed products and their packaging materials

| 301-3 | a. Percentage of reclaimed products and their packaging materials for each product category.
|       | b. How the data for this disclosure have been collected. |
|       | Not Disclosed |
302: Energy

302-1 Energy consumption within the organization

a. Total fuel consumption within the organization from non-renewable sources, in joules or multiples, and including fuel types used.
b. Total fuel consumption within the organization from renewable sources, in joules or multiples, and including fuel types used.

c. In joules, watt-hours or multiples, the total:
   i. electricity consumption
   ii. heating consumption
   iii. cooling consumption
   iv. steam consumption
d. In joules, watt-hours or multiples, the total:
   i. electricity sold
   ii. heating sold
   iii. cooling sold
   iv. steam sold
e. Total energy consumption within the organization, in joules or multiples.
f. Standards, methodologies, assumptions, and / or calculation tools used.
g. Source of the conversion factors used.

302-2 Energy consumption outside of the organization

a. Energy consumption outside of the organization, in joules or multiples.
b. Standards, methodologies, assumptions, and / or calculation tools used.
c. Source of the conversion factors used.

302-3 Energy intensity

a. Energy intensity ratio for the organization.
b. Organization-specific metric (the denominator) chosen to calculate the ratio.
c. Types of energy included in the intensity ratio; whether fuel, electricity, heating, cooling, steam, or all.
d. Whether the ratio uses energy consumption within the organization, outside of it, or both.

302-4 Reduction of energy consumption

a. Amount of reductions in energy consumption achieved as a direct result of conservation.
and efficiency initiatives, in joules or multiples. 

b. Types of energy included in the reductions; whether fuel, electricity, heating, cooling, steam, or all.

c. Basis for calculating reductions in energy consumption, such as base year or baseline, including the rationale for choosing it.

d. Standards, methodologies, assumptions, and/or calculation tools used.

302-5

Reductions in energy requirements of products and services

</tbody>
</table>
### Significant impacts of activities, products, and services on biodiversity

**304-2**

- a. Nature of significant direct and indirect impacts on biodiversity with reference to one or more of the following:
  - i. Construction or use of manufacturing plants, mines, and transport infrastructure;
  - ii. Pollution (introduction of substances that do not naturally occur in the habitat from point and non-point sources);
  - iii. Introduction of invasive species, pests, and pathogens;
  - iv. Reduction of species;
  - v. Habitat conversion;
  - vi. Changes in ecological processes outside the natural range of variation (such as salinity or changes in groundwater level).

- b. Significant direct and indirect positive and negative impacts with reference to the following:
  - i. Species affected;
  - ii. Extent of areas impacted;
  - iii. Duration of impacts;
  - iv. Reversibility or irreversibility of the impacts.

### Habitats protected or restored

**304-3**

- a. Size and location of all habitat areas protected or restored, and whether the success of the restoration measure was or is approved by independent external professionals.
- b. Whether partnerships exist with third parties to protect or restore habitat areas distinct from where the organization has overseen and implemented restoration or protection measures.
- c. Status of each area based on its condition at the close of the reporting period.
- d. Standards, methodologies, and assumptions used.
304-4 IUCN Red List species and national conservation list species with habitats in areas affected by operations

- Total number of IUCN Red List species and national conservation list species with habitats in areas affected by the operations of the organization, by level of extinction risk:
  - Critically endangered
  - Endangered
  - Vulnerable
  - Near threatened
  - Least concern

Biodiversity > Secure Local Biodiversity Conservation in the Nemuro Nature Conservation Area

305: Emissions

305-1 Direct (Scope 1) GHG emissions

- Gross direct (Scope 1) GHG emissions in metric tons of CO2 equivalent.
- Gases included in the calculation; whether CO2, CH4, N2O, HFCs, PFCs, SF6, NF3, or all.
- Biogenic CO2 emissions in metric tons of CO2 equivalent.
- Base year for the calculation, if applicable, including:
  - the rationale for choosing it;
  - emissions in the base year;
  - the context for any significant changes in emissions that triggered recalculation of base year emissions.
- Source of the emission factors and the global warming potential (GWP) rates used, or a reference to the GWP source.
- Consolidation approach for emissions; whether equity share, financial control, or operational control.
- Standards, methodologies, assumptions, and / or calculation tools used.

Climate Change > Environmental Management > Material Balance

ESG Data > Environment > Climate Change > Energy consumption / CO2 emissions

Integrated Report 2018 p36 : Caring for the Earth > Climate Change Initiatives > Domestic CO2 emissions volume for FY3/31 (PDF:14511KB)

305-2 Energy indirect (Scope 2) GHG emissions

- Gross location-based energy indirect (Scope 2) GHG emissions in metric tons of CO2 equivalent.
- If applicable, gross market based energy indirect (Scope 2) GHG emissions in metric tons of CO2 equivalent.
- If available, the gases included in the calculation; whether CO2, CH4, N2O, HFCs, PFCs, SF6, NF3, or all.

ESG Data > Environment > Climate Change > Energy consumption / CO2 emissions

Integrated Report 2018 p36 : Caring for the Earth > Climate Change Initiatives > Domestic CO2 emissions volume for FY3/31 (PDF:14511KB)

d. Base year for the calculation, if applicable, including:
   i. the rationale for choosing it;
   ii. emissions in the base year;
   iii. the context for any significant changes in emissions that triggered recalculations of base year emissions.

e. Source of the emission factors and the global warming potential (GWP) rates used, or a reference to the GWP source.

f. Consolidation approach for emissions; whether equity share, financial control, or operational control.

g. Standards, methodologies, assumptions, and / or calculation tools used.

---

a. Gross other indirect (Scope 3) GHG emissions in metric tons of CO2 equivalent.
b. If available, the gases included in the calculation; whether CO2, CH4, N2O, HFCs, PFCs, SF6, NF3, or all.
c. Biogenic CO2 emissions in metric tons of CO2 equivalent.
d. Other indirect (Scope 3) GHG emissions categories and activities included in the calculation.
e. Base year for the calculation, if applicable, including:
   i. the rationale for choosing it;
   ii. emissions in the base year;
   iii. the context for any significant changes in emissions that triggered recalculations of base year emissions.

f. Source of the emission factors and the global warming potential (GWP) rates used, or a reference to the GWP source.

g. Standards, methodologies, assumptions, and / or calculation tools used.
305-4 **GHG emissions intensity**
a. GHG emissions intensity ratio for the organization.
b. Organization-specific metric (the denominator) chosen to calculate the ratio.
c. Types of GHG emissions included in the intensity ratio; whether direct (Scope 1), energy indirect (Scope 2), and/or other indirect (Scope 3).
d. Gases included in the calculation; whether CO2, CH4, N2O, HFCs, PFCs, SF6, NF3, or all.

305-5 **Reduction of GHG emissions**
a. GHG emissions reduced as a direct result of reduction initiatives, in metric tons of CO2 equivalent.
b. Gases included in the calculation; whether CO2, CH4, N2O, HFCs, PFCs, SF6, NF3, or all.
c. Base year or baseline, including the rationale for choosing it.
d. Scopes in which reductions took place; whether direct (Scope 1), energy indirect (Scope 2), and/or other indirect (Scope 3).
e. Standards, methodologies, assumptions, and/or calculation tools used.

305-6 **Emissions of ozone-depleting substances (ODS)**
a. Production, imports, and exports of ODS in metric tons of CFC-11 (trichlorofluoromethane) equivalent.
b. Substances included in the calculation.
c. Source of the emission factors used.
d. Standards, methodologies, assumptions, and/or calculation tools used.

305-7 **Nitrogen oxides (NOx), sulfur oxides (SOx), and other significant air emissions**
a. Significant air emissions, in kilograms or multiples, for each of the following:
   i. NOx
   ii. SOx
   iii. Persistent organic pollutants (POP)
   iv. Volatile organic compounds (VOC)
   v. Hazardous air pollutants (HAP)
vi. Particulate matter (PM)

vii. Other standard categories of air emissions identified in relevant regulations

b. Source of the emission factors used.

c. Standards, methodologies, assumptions, and/or calculation tools used.

306: Effluents and Waste

306-1 Water discharge by quality and destination

a. Total volume of planned and unplanned water discharges by:
   i. destination;
   ii. quality of the water, including treatment method;
   iii. whether the water was reused by another organization.

b. Standards, methodologies, and assumptions used.

306-2 Waste by type and disposal method

a. Total weight of hazardous waste, with a breakdown by the following disposal methods where applicable:
   i. Reuse
   ii. Recycling
   iii. Composting
   iv. Recovery, including energy recovery
   v. Incineration (mass burn)
   vi. Deep well injection
   vii. Landfill
   viii. On-site storage
   ix. Other (to be specified by the organization)

b. Total weight of non-hazardous waste, with a breakdown by the following disposal methods where applicable:
   i. Reuse
   ii. Recycling
   iii. Composting
   iv. Recovery, including energy recovery
   v. Incineration (mass burn)
   vi. Deep well injection
   vii. Landfill
   viii. On-site storage
   ix. Other (to be specified by the organization)

Climate change > Environmental Management > Material Balance

ESG Data > Environment > Water

ESG Data > Environment > Circular Economy > Total waste
c. How the waste disposal method has been determined:
   i. Disposed of directly by the organization, or otherwise directly confirmed
   ii. Information provided by the waste disposal contractor
   iii. Organizational defaults of the waste disposal contractor

internationally protected area;
iii. the biodiversity value, such as total number of protected species.

307: Environmental Compliance

- a. Significant fines and non-monetary sanctions for non-compliance with environmental laws and/or regulations in terms of:
  i. total monetary value of significant fines;
  ii. total number of non-monetary sanctions;
  iii. cases brought through dispute resolution mechanisms.
- b. If the organization has not identified any non-compliance with environmental laws and/or regulations, a brief statement of this fact is sufficient.

308: Supplier Environmental Assessment

- a. Percentage of new suppliers that were screened using environmental criteria.
- Not Disclosed

- a. Number of suppliers assessed for environmental impacts.
- b. Number of suppliers identified as having significant actual and potential negative environmental impacts.
- c. Significant actual and potential negative environmental impacts identified in the supply chain.
- d. Percentage of suppliers identified as having significant actual and potential negative environmental impacts with which improvements were agreed upon as a result of assessment.
- e. Percentage of suppliers identified as having significant actual and potential negative environmental impacts with which relationships were terminated as a result of assessment, and why.

- Sustainable Procurement > Procure Raw Materials With Consideration Toward Human Rights and the Environment > Supplier Assessment > Supplier Assessment in Accordance With the Meiji Group Procurement Policy
Social

401: Employment

401-1 New employee hires and employee turnover

a. Total number and rate of new employee hires during the reporting period, by age group, gender and region.
b. Total number and rate of employee turnover during the reporting period, by age group, gender and region.

E401 Data > Society > Turnover rate (less than 3 years for new graduates) / New employees

401-2 Benefits provided to full-time employees that are not provided to temporary or part-time employees

a. Benefits which are standard for full-time employees of the organization but are not provided to temporary or part-time employees, by significant locations of operation. These include, as a minimum:
   i. life insurance;
   ii. health care;
   iii. disability and invalidity coverage;
   iv. parental leave;
   v. retirement provision;
   vi. stock ownership;
   vii. others.
b. The definition used for 'significant locations of operation'.

Not Disclosed

401-3 Parental leave

a. Total number of employees that were entitled to parental leave, by gender.
b. Total number of employees that took parental leave, by gender.
c. Total number of employees that returned to work in the reporting period after parental leave ended, by gender.
d. Total number of employees that returned to work after parental leave ended that were still employed 12 months after their return to work, by gender.
e. Return to work and retention rates of employees that took parental leave, by gender.

ESG Data > Society > Child leave / Shortened working hours for child purposes / Return to work rates after child care leave / Retention rates after two months of child care leave
